Lecturers in academic year 2023-2024

Van Daele, MaartenWE13lecturer-in-chargeMeyer, InkaWE13co-lecturerWils, KatleenWE13co-lecturer

Offered in the following programmes in 2023-2024

Master of Science in Marine and Lacustrine Science and Management 6 A

Teaching languages

English

Keywords

Sediment sampling equipment, analytical techniques in sedimentology, sedimentological case-studies

Position of the course

This course is focused on the use of sediments for research purposes. It builds on the general principles of sediment production, transport, and deposition that were introduced at the Bachelor level.

Contents

Sediment sampling techniques, in-situ sediment monitoring instruments, coring equipment.

Analytical techniques in sedimentology.

Core logging instrumentation: Multi-sensor core loggers, XRF and CT core scanners. Interpretation of multi-proxy sediment records, including age-depth modeling. Recent advances in sedimentology.

Case-studies (seminars given by guest speakers).

Initial competences

The student knows the basic concepts of sedimentology and stratigraphy, such as sediment production, transport and deposition. He/she knows the main depositional environments.

Final competences

- 1 The student can design a research project based on sediments and sedimentary archives.
- 2 He/she is able to select the most appropriate techniques to analyze sediments for specific purposes.
- 3 He/she can combine and interpret data obtained using several independent techniques.

Conditions for credit contract

Access to this course unit via a credit contract is determined after successful competences assessment

Conditions for exam contract

(Approved) 1

This course unit cannot be taken via an exam contract

Teaching methods

Group work, Seminar, Lecture

Learning materials and price

Course notes, hand-outs, and scientific articles available on Ufora.

References

Specific scientific articles given during the course.

Course content-related study coaching

Discussion of problems and questions during and after the lectures and seminars. Continued support by teaching assistants during the practical exercises.

Assessment moments

end-of-term and continuous assessment

Examination methods in case of periodic assessment during the first examination period

Written assessment with open-ended questions

Examination methods in case of periodic assessment during the second examination period

Written assessment with open-ended questions

Examination methods in case of permanent assessment

Presentation, Assignment

Possibilities of retake in case of permanent assessment

examination during the second examination period is not possible

Calculation of the examination mark

- Theoretical exam: 75%
- Group report (age depth modelling): 15%
- Presentation (and discussion) of paper: 10%

(Approved) 2
