

## Bioreactor and Microalgae (C004460)

**Course size** *(nominal values; actual values may depend on programme)*

**Credits** 3.0

**Study time** 75 h

**Course offerings in academic year 2023-2024**

A (semester 1)

English

Gent

**Lecturers in academic year 2023-2024**

**Offered in the following programmes in 2023-2024**

[International Master of Science in Marine Biological Resources](#)

**crdts**

3

**offering**

A

**Teaching languages**

English

**Keywords**

**Position of the course**

**Contents**

Fundamentals of main unit operations encountered in microalgae harvesting, cells disruption and metabolites extraction will be presented. This comprises centrifugation, membrane concentration or fractionation, high pressure or bead milling cell disruption and solvent extraction.

**Initial competences**

**Final competences**

To know the available techniques, to understand their main engineering aspects and to be able to propose a process scheme for a microalgae metabolite valorization.

**Conditions for credit contract**

Access to this course unit via a credit contract is determined after successful competences assessment

**Conditions for exam contract**

This course unit cannot be taken via an exam contract

**Teaching methods**

**Extra information on the teaching methods**

Students will have to manage in small group a biorafinery practical case from the photobioreactor to the fraction of interest.

**Learning materials and price**

**References**

**Course content-related study coaching**

**Assessment moments**

**Examination methods in case of periodic assessment during the first examination period**

**Examination methods in case of periodic assessment during the second examination period**

**Examination methods in case of permanent assessment**

**Possibilities of retake in case of permanent assessment**

not applicable

**Calculation of the examination mark**
