Master of Science in Business Economics (main subject Marketing)	6	A
Master of Science in Complementary Studies in Business Economics(main subject Taxation )	6	A

### Teaching languages

Dutch

### Keywords

Taxable income, calculation of income tax, tax reductions, tax credits

### Position of the course

This course builds on the knowledge acquired in the basic course in tax law.

The elements necessary to determine the taxable income of a taxable person are discussed. Before the tax payable can be calculated, the taxable income of married couples, legal and de facto cohabitants needs to be allocated to the individual taxpayer.

The types of income that were not handled during the basic course are studied: profits and benefits from a previous professional activity, remuneration of assisting spouses and pensions. After the amount of the total net income is determined, maintenance funds that would have been paid have to be deducted to arrive at the taxable income.

When the taxable income is determined, several steps are still needed before the amount of income tax payable is finally known. Numerous tax reductions have to be taken into account, as well as tax credits. Due to the partial regionalization of the income taxation, a significant amount of federal income tax measures have become regional.

Students are divided into small groups. Each group examines and analyzes a scientific article from a law magazine regarding a topic from the personal income tax. The content is presented to fellow students.

### Contents

- Scope of income tax
- Determination of the taxable income
- Deductible amounts
- Tax reductions

-Tax credits

### Initial competences

"Advanced Income taxation" supposes a basic knowledge of tax law.

### Final competences

- 1 Scientific knowledge of income taxation.
- 2 Understanding of the structure of income taxation.
- 3 Interpret and reconstruct a tax assessment.
- 4 Having a scientific knowledge of the relation and interaction of income taxation with other branches of law.
- 5 Ability of using the research methodology.
- 6 Analyzing problems in a team, organizing thoughts logically and inform an audience.
- 7 Applying existing tax rules to new situations.
- 8 Following discussions within income taxation.
- 9 Detecting loopholes in the tax legislation.
- 10 Formulating creative solutions.
- 11 Developing an attitude of self-study and lifelong learning.
- 12 Sense of accuracy in juridical analysis.
- 13 Sense of responsibility in relation to the taxpayer
