### Teaching languages

Dutch

### Keywords

Migration, humanities, migration humanities, critical thinking, current issues, mobility, interculturality, multilingualism

### Position of the course

This course is a general education course that aims to introduce students to different disciplines, perspectives, and concepts from the humanities through a specific theme that changes every one or two years. Every week different instructors from the faculty of Arts and Philosophy approach the central theme through the lens of their own discipline.

### Contents

A current social theme will be explored using insights from the humanities. In the

(Approved)

2025-2026 academic year, we will address the theme "Migration".

Migration is a dynamic phenomenon that profoundly shapes both individuals and societies.

People migrate for many reasons: love, education, work, safety, or climate change.

Migration can be temporary or permanent, voluntary or forced, near or far. This course takes an interdisciplinary approach to migration through the lens of the Migration Humanities – a research field that explores migration using the tools and insights of the humanities, such as history, philosophy, linguistics, literary studies, art history, and area studies.

While migration is often studied within social science, economic, legal, or political frameworks, the humanities shed light on how migration is experienced, narrated, remembered, and represented through language, imagery, literature, and culture. Philosophy offers tools for thinking through the ethical questions migration raises – ranging from ethics with regard to border controls or tensions between universal human rights and national sovereignty, to the rights and responsibilities of newcomers. History helps us understand how migration has shaped identities, driven cultural exchange, and transformed societies over time. Archaeological research into the material traces of migration – from ancient trade routes to modern refugee camps – reveals how migration leaves lasting marks on landscapes and heritage. Linguistics and applied linguistics examine how migration leads to language contact and change, how language skills, language use, and language ideologies can either open up or limit access to services and social spaces, and how migration is framed in public discourse – in media, politics, and law – influencing both public perception and policy. Literary and art studies allow us to explore how migration is imagined, how migrant stories are told, and how literary and visual representations shape the way we view migration. Area studies complement insights from receiving countries with crucial transnational perspectives – showing how migration creates global connections, how migrant networks operate, and how communities across different parts of the world respond to the challenges and opportunities that migration brings.

The lectures will introduce students to a broad spectrum of humanities approaches to migration. Every week, one or more experts from a different discipline will shine their light on the topic. Each time, a general reflection on the contribution a particular humanities discipline can make to a better understanding of and/or effective approach to migration will be combined with one or more case studies demonstrating that added value.

For more information, see [www.ugent.be/lw/contextennuance](http://www.ugent.be/lw/contextennuance).

### **Initial competences**

### **Final competences**

- 1 Having the ability to approach social issues and views critically and from an interdisciplinary perspective.
- 2 Having the ability to contextualize and interpret research results from the humanities within a societal frame of reference.
- 3 Having the ability to reflect on the stratification of cultural phenomena, both in terms of interculturality and in terms of continuity and change in a long-term perspective.
- 4 Having a basic knowledge of the diversity of disciplines within the humanities.
- 5 Having insight into the theoretical models used within the humanities.

### **Conditions for credit contract**

Access to this course unit via a credit contract is unrestricted: the student takes into consideration the conditions mentioned in 'Starting Competences'

### **Conditions for exam contract**

This course unit cannot be taken via an exam contract

### **Teaching methods**

Seminar, Lecture

### **Extra information on the teaching methods**

The introductory lecture will explain the annual theme will be explained, and the contribution of the migration humanities to the migration debate will be discussed

in general terms. Migration humanities is an interdisciplinary field of research that examines migration as a fundamentally human experience, viewed through the lens of cultural, historical, linguistic, literary, philosophical, and artistic practices.

The subsequent lectures will each be taught by one or more experts from different disciplines. Each of these lectures requires preparation by the students, such as reading a literary or academic text, watching a film (or excerpt), listening to a podcast, or visiting an exhibition.

In addition to this general preparation, students will be assigned to interdisciplinary groups at the start of the semester. For each lecture, at least one group will be designated to prepare discussion questions for that specific session and to help moderate the interaction with the guest expert(s). These questions will be shared in advance with the other students via the Ufora learning platform and will serve as the basis for debate and interaction during the lectures.

#### **Course content-related study coaching**

Interactive teaching in the classroom, office hours.

#### **Assessment moments**

end-of-term and continuous assessment

#### **Examination methods in case of periodic assessment during the first examination period**

Written assessment with open-ended questions

#### **Examination methods in case of periodic assessment during the second examination period**

Written assessment with open-ended questions

#### **Examination methods in case of permanent assessment**

Participation

#### **Possibilities of retake in case of permanent assessment**

examination during the second examination period is possible

#### **Extra information on the examination methods**

Participation and limited written output: students work in small groups to prepare discussion questions and provide insight into how these were developed. Specific modalities will be communicated during the first lecture.

#### **Calculation of the examination mark**

Exam: 80%

Participation/limited written output: 20%

If students do not participate in both components of the evaluation, they cannot pass the course, and the final mark, if higher than 7/20, will be lowered to the highest non-deliberable mark (7/20).

If it is determined that there are significant differences in the extent to which students from the same group contributed to the writing of the report, the grading for this component may differ for each student.

#### **Facilities for Working Students**

Class attendance is mandatory and will be included in the calculation of the final score.
