A

Teaching languages

English

Keywords

photovoltaics, solar energy, sustainable energy

Position of the course

To get familiar to solar energy and its conversion to electrical work, by means of the photovoltaic effect.

Ecologic advantages of sustainable energy.

Positioning of the sustainable energies within a broader thermodynamic context.

Contents

- Availability of solar energy
- Thermal conversion
- Principles of photovoltaic conversion
- Realistic efficiency
- Classical silicon solar cells (mono and polycrystalline)
- Amorphous solar cells
- GaAs solar cells
- Heterojunction solar cells
- Ecology and economy

Initial competences

basics of thermodynamics, quantumphysics, solid-state physics, semi-conductor physics, diode theory

Final competences

- 1 INSIGHTS: Understanding the basic principles of photovoltaic energy conversion. Understanding the limitations of realistic solar panels.
- 2 INSIGHTS: The ecological benefits of sustainable energy. Understanding the efficiency and limitations of photovoltaic and thermal energy conversion.
- 3 PROFICIENCIES: Calculations of the available solar energy.
- 4 PROFICIENCIES: Calculations of the conversion and the conversion efficiency of solar energy.

Conditions for credit contract

Access to this course unit via a credit contract is determined after successful competences assessment

Conditions for exam contract

This course unit cannot be taken via an exam contract

Teaching methods

Seminar, Lecture

Study material

Type: Syllabus

Name: Photovoltaic energy conversion and sustainable energy

Indicative price: Free or paid by faculty

Optional: no

Language : English

Number of Pages : 216

Oldest Usable Edition : 2022

Available on Ufora : Yes

Online Available : Yes

Available in the Library : No

Available through Student Association : No

References**Course content-related study coaching****Assessment moments**

end-of-term and continuous assessment

Examination methods in case of periodic assessment during the first examination period

Oral assessment, Written assessment

Examination methods in case of periodic assessment during the second examination period

Oral assessment, Written assessment

Examination methods in case of permanent assessment**Possibilities of retake in case of permanent assessment**

examination during the second examination period is possible

Extra information on the examination methods

During examination period: written closed-book exam; oral closed-book exam

non-period-bound evaluation: computer practicum with report

Calculation of the examination mark

period-bound evaluation: written+oral examination: 80%

non-period-bound evaluation: report computer practicum: 20%
