<a href="#">Bachelor of Science in Economics (Double Degree)</a>	3	A

**Teaching languages**

Dutch

**Keywords**

Economic challenges, sustainability

**Position of the course**

The course analyses a variety of contemporary problems, such that students are confronted with the wide variety of topics to which economic reasoning can be applied. This should stimulate a critical attitude towards arguments that are used in the political debate, and help students to formulate their personal point of view. This course is part of the learning path sustainability in the Bachelor of Science in Economics.

**Contents**

Topics can change from year to year and depend on the current economic situation. Examples of economic analysis of contemporary challenges

- 1 Valuation problems on financial markets
- 2 Globalisation and inequality
- 3 Challenges for the Flemish labour market
- 4 Energy and climate challenges and policy
- 5 Demographic change (ageing): consequences and policy
- 6 Determinants and consequences of automation
- 7 Fiscal policy and public debt reduction in the EU
- 8 Tax policy and (un)employment
- 9 Migration: causes and challenges
- 10 Poverty and inequality

**Initial competences**

Understand basic concepts of economics. Good knowledge of macroeconomics and microeconomics (bachelor level). Introductory course in economics.

**Final competences**

- 1 Understanding the essence of the main economic challenges for the coming decades and the societal debate about it
- 2 Be able to have a substantiated opinion on key societal challenges
- 3 To be able to apply basic economic theory critically to analyse contemporary economic challenges.
