

## Introduction Research Methods (F710362)

**Course size** *(nominal values; actual values may depend on programme)*

**Credits** 5.0

**Study time** 150 h

### Course offerings and teaching methods in academic year 2025-2026

A (semester 2)

Dutch

Gent

seminar

lecture

independent work

### Lecturers in academic year 2025-2026

Baert, Stijn

EB21

lecturer-in-charge

Vanderhoudelingen, Véronique

EB25

co-lecturer

Verlet, Dries

EB25

co-lecturer

### Offered in the following programmes in 2025-2026

[Bachelor of Science in Public Administration and Management](#)

**crdts**

5

**offering**

A

### Teaching languages

Dutch

### Keywords

Research motivation, research question, theory formation, data gathering, qualitative analysis, quantitative analysis, research report, statistics, information skills, writing skills

### Position of the course

This course unit offers students an overview of the key concepts and essential lines of reasoning and techniques in public administration research

### Contents

1. Characteristics and types of public administration research
2. Research ethics
3. Societal and scientific relevance of a research topic
4. Problem definition
5. Theoretical framework, operationalisation and research design
6. Information skills
7. Writing skills
8. Introduction to data gathering via existing sources, surveys, experiments and case studies
9. Introduction to qualitative data gathering
10. Introduction to quantitative data gathering
11. Introduction to statistics: descriptive statistics, univariate analysis and bivariate analysis
12. Research report

### Initial competences

### Final competences

- 1 Knowledge and an understanding of essential concepts and lines of reasoning in public management research
- 2 Formulating relevant and clear research questions
- 3 Consulting and selecting relevant scientific sources
- 4 Basic understanding of data gathering
- 5 Basic understanding of data analytics

- 6 Reporting on a research project
- 7 Writing a research proposal
- 8 Judging the quality of relevant scientific research
- 9 Knowledge and an understanding of (the application of) essential concepts and lines of reasoning in statistics (ordering, compiling and graphical representation of data; types of variables; frequency distributions; position and dispersion; correlation and causality; contingency table; correlation, analysis of variance)
- 10 Comprehensive reading and summarising a Dutch or English scientific text
- 11 Academic writing in Dutch; focus on structure, style, language and APA-references.

#### **Conditions for credit contract**

Access to this course unit via a credit contract is unrestricted: the student takes into consideration the conditions mentioned in 'Starting Competences'

#### **Conditions for exam contract**

This course unit cannot be taken via an exam contract

#### **Teaching methods**

Seminar, Lecture, Independent work

#### **Study material**

Type: Handbook

Name: Bestuurskundig onderzoek

Indicative price: € 33

Optional: yes

Language : Dutch

Author : Sandra Van Thiel

ISBN : 978-9-04690-803-7

Number of Pages : 240

Oldest Usable Edition : 3e (2015)

Online Available : No

Available in the Library : Yes

Available through Student Association : Yes

Usability and Lifetime within the Course Unit : regularly

Usability and Lifetime within the Study Programme : regularly

Usability and Lifetime after the Study Programme : occasionally

#### **References**

The learning material lists further references

#### **Course content-related study coaching**

Students can contact the lecturers regarding any content-related questions; they are available before, during and after the lectures, and can be contacted by e-mail

#### **Assessment moments**

end-of-term and continuous assessment

#### **Examination methods in case of periodic assessment during the first examination period**

Written assessment

#### **Examination methods in case of periodic assessment during the second examination period**

Written assessment

#### **Examination methods in case of permanent assessment**

Assignment

#### **Possibilities of retake in case of permanent assessment**

examination during the second examination period is possible

#### **Extra information on the examination methods**

End-of-term evaluation: written examination (open book)

Permanent evaluation: thematic assignments (written reports and analyses)

#### **Calculation of the examination mark**

End-of-term evaluation 50% and continuous assessment 50%
