

## Extended Internship (I002639)

**Course size** *(nominal values; actual values may depend on programme)*

**Credits 10.0**                      **Study time 300 h**

**Course offerings in academic year 2025-2026**

A (Year)                      English                      Gent

**Lecturers in academic year 2025-2026**

Ragaert, Peter                      LA23                      lecturer-in-charge

**Offered in the following programmes in 2025-2026**

	crdts	offering
<a href="#">Master of Science in Bioscience Engineering: Agricultural Sciences</a>	10	A
<a href="#">Master of Science in Bioscience Engineering: Chemistry and Bioprocess Technology</a>	10	A
<a href="#">Master of Science in Bioscience Engineering: Land, Water and Climate</a>	10	A
<a href="#">Cross-Disciplinary Elective Set for Bioscience Engineers</a>	10	A

**Teaching languages**

English, Dutch

**Keywords**

Internship, industrial practice

**Position of the course**

This course cannot be selected in combination with the course Internship (not even in another academic year), and relates to internships that last 40 instead of 20 working days. The purpose of an internship is to allow students to test the knowledge acquired during their studies against industrial practice. Internships are usually performed during the summer break (preceding the 1st or 2nd Master) but can be scheduled during other periods.

**Contents**

An internship is not focused on academic research and cannot be seen as a precursor to a master's thesis. It is performed outside the academic world and preferably in a company, or at least in an organization with a strong link to business or socio-economic practice. The student should gain a representative picture of the chosen work field and be involved in activities that offer sufficient challenge in terms of content. Afterwards a written and oral report will be made on both the scientific and socio-economic context.

**Initial competences**

Students have acquired the competences of a bachelor in Bio-engineering sciences

**Final competences**

- 1 Implement knowledge, competences and methodologies in a non-academic environment
- 2 Proceed in an organized, accurate and structured fashion
- 3 Demonstrate independence, creativity, personal initiative and critical reflection
- 4 Function as a member of a team in a professional environment
- 5 Report in writing and orally with attention to scientific correctness and depth
- 6 Report in writing and orally with attention to language, structure and design

**Conditions for credit contract**

This course unit cannot be taken via a credit contract

**Conditions for exam contract**

This course unit cannot be taken via an exam contract

**Teaching methods**

Work placement

**Extra information on the teaching methods**

Practical training

**Study material**

Type: Other

Name: Portal page: Internship - Bio-engineering

Indicative price: Free or paid by faculty

Optional: no

Additional information: <https://www.ugent.be/bw/en/for-students/curriculum/internship-bioir>

Type: Other

Name: Internship

Indicative price: Free or paid by faculty

Optional: no

Additional information: Costs depend on internship location and students have to contribute themselves for travel expenses (both domestically and internationally).

continuous assessment

**Examination methods in case of periodic assessment during the first examination period****Examination methods in case of periodic assessment during the second examination period****Examination methods in case of permanent assessment**

Oral assessment, Assignment

**Possibilities of retake in case of permanent assessment**

examination during the second examination period is possible in modified form

**Extra information on the examination methods**

Written and oral report.

Students who eschew period aligned and/or non-period aligned evaluations for this course unit may be failed by the examiner.

**Calculation of the examination mark**

Assessment by the supervisor (practical skills and personality characteristics) and promoter (scientific contents and lay-out of the written report) via a score sheet.
