

MASTER OF SCIENCE IN BIOINFORMATICS (SYSTEMS BIOLOGY)

120 ECTS CREDITS - LANGUAGE: ENGLISH

WHAT

Recent technological advances have changed our view on life science research dramatically, and have turned biology into a data-driven science. It is in this context that bioinformatics, a booming interdisciplinary field, has evolved from a new research field into a basic discipline in only fifteen years. Bioinformatics aims at gaining a better and preferentially more quantitative molecular understanding of cellular processes by integrating and modelling high-throughput molecular data.

- Are you fascinated with both engineering/mathematics and the biological aspects of science?
- Do you like problem-solving through data analysis and data mining?
- Are you intrigued by understanding and modelling complex biological processes,
- Do you want to make biological discoveries by decoding big data?
- Do you like to work in an interdisciplinary environment?
- Do you want to study fundamental biological processes through integration of modern sequencing techniques and mathematical models?
- Do you want to apply individual genome sequencing for personalized health care?
- Do you want to contribute to facilitating the use of modern molecular technologies in the industry and the public sector?

If the answer to the questions above is a resounding 'yes', our Bioinformatics programme is the right choice for you! As a bioinformatician, you will become an interdisciplinary scientist or engineer who can develop or use state-of-the-art statistical and computer science techniques to mine molecular data in order to answer fundamental or applied biological and biomedical questions. Ghent University offers an interfaculty Master of Science in Bioinformatics programme, which - depending on the chosen track - can result in an Engineering or Bioscience Engineering degree.

The programme

- offers a track tuned to your specific interests and background, which prepares you for different job profiles in the field of bioinformatics (bioinformatics scientist and bioinformatics engineer, respectively);
- offers both in-depth theoretical and data analytical/problem-solving skills;
- is embedded in a strong bioinformatics and biotechnology research environment, located at the Faculties of Sciences, Medicine and Health Sciences, Bioscience Engineering, and Engineering and Architecture. It is also affiliated with VIB and IMEC.

Master of Science in Bioinformatics: Systems Biology

You can enter the Master's programme to become a

bioinformatics scientist or bioinformatics bioengineer with a Bachelor's degree in Biochemistry and Molecular Biology, or in Bioscience Engineering. A bioinformatics scientist applies (bio)informatics tools and techniques to understand a biological system or to solve an innovative research question. You are trained as a problem-solver who can combine bioinformatics tools and algorithms to analyse, integrate and model data in a creative manner. Having the essential programming and data analysis skills requires a deep understanding of statistics, programming and data analytical techniques (a 20 credit module of Applied Mathematics and Informatics). The Applied Bioinformatics Module (33 credits) will make you familiar with the basic data analytical methods (e.g. NGS analysis), help you to acquire interdisciplinary skill sets and illustrate how theoretical concepts of statistics and data mining are used to build bioinformatics tools.

The difference between the Bioscience Engineering and the Systems Biology track is that the former deepens the engineering skills (Bioscience Engineering track of 23 credits), whereas the Systems Biology track (30 credits) focuses more on advanced knowledge of (systems) biology. The Master's dissertation takes up 30 credits and focuses on a research topic. In your curriculum there is opportunity to do a work placement to familiarize yourself with the role and expectations of a bioinformatics scientist in the industry or at a government agency.

STRUCTURE

LABOUR MARKET

Technological advances have turned biology into a data-driven science. The wealth of molecular data enables key discoveries in biology, ecology and molecular evolution, drives innovation in the biotech and pharma industry and supports medical and governmental decision-making. However, the power of using these data for innovation depends on interdisciplinary skills to analyse, integrate and interpret the data.

There is thus an urgent need for bioinformatics scientists and engineers with an interdisciplinary mindset. There is currently a large discrepancy between the exponential increase of biological data (28% each year) and the number of newly graduated bioinformaticians (increase of only 5.8%) who typically find a job in agro, biotech and pharma industry, in research and government agencies, and in genetics centres and hospitals. Because of their interdisciplinary and analytical skill sets, bioinformaticians also find their way into consultancy, spin-offs and data analytics.

MASTER OF SCIENCE IN BIOINFORMATICS (SYSTEMS BIOLOGY)

120 ECTS CREDITS - LANGUAGE: ENGLISH

TOELATINGSVOORWAARDEN VOOR HOUDERS VAN EEN VLAAMS DIPLOMA

1 Rechtstreeks:

- Bachelor in de bio-ingenieurswetenschappen, afstudeerrichting: cel- en genbiotechnologie
- Bachelor in de biochemie en de biotechnologie
- Bachelor of Molecular Biotechnology

2 Rechtstreeks, na check door de inrichtende faculteit van formele toelatingsvereisten:

- Bachelor in de bio-ingenieurswetenschappen, op voorwaarde dat het curriculum van de student een zwaartepunt 'cel- en gentechnologie' omvat.*

3 Na het met succes voltooien van een voorbereidingsprogramma:

aantal studiepunten te bepalen door de faculteit

- Bachelor in de bio-ingenieurswetenschappen, andere afstudeerrichting dan 'cel- en genbiotechnologie'
- Bachelor in de biologie
- Bachelor in de biomedische wetenschappen
- Bachelor in de biowetenschappen
- Bachelor in de chemie
- Bachelor in de computerwetenschappen
- Bachelor in de fysica
- Bachelor in de fysica en de sterrenkunde
- Bachelor in de geneeskunde
- Bachelor in de industriële wetenschappen, afstudeerrichting: chemie
- Bachelor in de industriële wetenschappen: chemie
- Bachelor in de industriële wetenschappen: milieukunde
- Bachelor in de informatica
- Bachelor in de wiskunde
- Een diploma van een opleiding 'Bachelor of Science in de ingenieurswetenschappen' (met inbegrip van 'architectuur')
- Master in de biowetenschappen
- Master in de industriële wetenschappen: biochemie
- Master in de industriële wetenschappen: chemie
- Master in de industriële wetenschappen: milieukunde

4 Na het met succes voltooien van een schakelprogramma:

aantal studiepunten te bepalen door de faculteit

- Bachelor in de bio-informatica
- Bachelor in de biomedische laboratoriumtechnologie, afstudeerrichting: farmaceutische en biologische laboratoriumtechnologie

- Bachelor in de chemie, afstudeerrichting: biochemie
- Bachelor in de chemie, afstudeerrichting: chemie

ADMISSION REQUIREMENTS FOR INTERNATIONAL DEGREE STUDENTS

Information on admission requirements and the administrative procedure for admission on the basis of a diploma obtained abroad, can be found on the following page: www.ugent.be/admission

Additional information:

- Diploma equivalence of international bachelor's degree students will be checked by the OC on the basis of their individual dossier.
- Students who wish to enrol must add the result of a GRE test to their application, more specifically the result of the Quantitative Reasoning of the General Test. The GRE test result will be assessed using the [grading scale of the Faculty of Engineering and Architecture](#).

LANGUAGE REQUIREMENTS

Language requirements Dutch: no language requirements
English: CEFR level B2

The language requirements for this study programme can be found on: www.ugent.be/language requirements

MASTER OF SCIENCE IN BIOINFORMATICS (SYSTEMS BIOLOGY)

120 ECTS CREDITS - LANGUAGE: ENGLISH

Enrolling institution

Information on enrolment at Ghent University.

Application Deadline (for International degree students)

For students who **need a visa**: before 1st of April

For students who **do not need a visa**: before 1st of June
