

# MASTER OF SCIENCE IN BIOLOGY

MAJORS: GLOBAL CHANGE ECOLOGY - FUNCTIONAL BIOLOGY - GENERAL BIOLOGY - BIODIVERSITY AND EVOLUTIONARY BIOLOGY

MINORS: RESEARCH - BIO-INSPIRED INNOVATION AND SUSTAINABILITY

120 ECTS CREDITS - LANGUAGE: ENGLISH

## WHAT

The Master in Biology has a far-reaching impact on numerous areas within science and society. The research domain of biology itself is very broad, and covers the entire spectrum of life, its diversity and its formation at all the different organisation levels, ranging from a cell and ecosystem to the level of the biosphere. Current topics and challenges such as protection of endangered species, global change, sustainability, cloning of organisms, dangerous diseases and medical progress all have their roots in biology. Biology also contributes to numerous conceptual innovations that lead towards new disciplines such as molecular biology and biotechnology. Biology is an exciting and ever-evolving field of study thanks to its close interaction with a broad range of other disciplines such as chemistry, geology, geography and physics.

## STRUCTURE

The two-year Master's programme (120 credits) contains the following components:

- 18 credits worth of general course units;
- 42 credits worth of major course units;
- 30 credits worth of minor (elective) course units;
- 30 credits worth of Master's dissertation.

The general course units prepare students for making an informed choice of major course units and their Master's dissertation.

In the first year of the Master's programme students choose one of four possible majors:

- General Biology
- Biodiversity and Evolutionary Biology
- Global Change Ecology
- Functional biology

Their choice of major allows students to deepen their knowledge of one of the research areas in which Ghent University has expertise.

Students can also choose one of two minors, both consisting of broadening elective course units.

Possible combinations between minors and majors are:

- Bio-inspired Innovation and Sustainability Minor - General Biology Major
- Research Minor - Biodiversity and Evolutionary Biology Major
- Research Minor - Global Change Ecology Major
- Research Minor - Functional Biology Major.

Students write their Master's dissertation on a topic related to their choice of major. Most Master's dissertations dovetail with current national or international (research) projects. However, the Master's dissertation can also exploit the results of specific projects or it can even have a prospective character regarding future projects.

In addition to the (domain) Master's programme described above, you can also choose a Master's Programme in Teaching (in Dutch: *Educatieve Master*). The *Educatieve Master*, however, is a Dutch-taught programme. Find out more at [www.ugent.be/educatievemaster](http://www.ugent.be/educatievemaster) (in Dutch).

## LABOUR MARKET

Biology graduates can be professionally active in quite a broad spectrum of jobs. One important sector is scientific research at universities or other scientific research institutes, but they can also apply their research skills within an industrial context, at companies with research and development as their core business. Their professional choice can also be more education-oriented, both at secondary or higher education level, but also indirectly in counselling or managerial positions within the government. Over the last couple of decades, the biologist's job profile has become quite versatile, with new perspectives being offered by more applied research in an industrial context. The term industry must be interpreted broadly here, ranging from biotech and food technology, to the pharmaceutical and biomedical industry. Overall, the labour market is looking for more scientifically trained people, with a multitude of possible specifications. Many biologists are also professionally active in production, quality control and sales (e.g. biology or research related products), but also their statistical skills are highly valued. Our graduates can thus also apply their computing and statistical data analysis skills in several fields of the labour market.

# MASTER OF SCIENCE IN BIOLOGY

120 ECTS CREDITS - LANGUAGE: ENGLISH

## TOELATINGSVOORWAARDEN VOOR HOUDERS VAN EEN VLAAMS DIPLOMA

### 1 **Rechtstreeks:**

- Bachelor in de biologie

### 2 **Na het met succes voltooien van een voorbereidingsprogramma:**

#### 55 SP

- Bachelor in de bio-ingenieurswetenschappen
- Bachelor in de biochemie en de biotechnologie
- Bachelor in de biomedische wetenschappen
- Bachelor in de diergeneeskunde
- Bachelor in de farmaceutische wetenschappen
- Bachelor in de geneeskunde

#### 72 SP

- Bachelor in de chemie
- Bachelor in de geologie
- Bachelor in de industriële wetenschappen, afstudeerrichting: chemie
- Bachelor in de industriële wetenschappen: chemie

#### 80 SP

- Bachelor in de fysica en de sterrenkunde
- Bachelor in de geografie en de geomatica
- Bachelor in de informatica
- Bachelor in de wiskunde

Additional Information on Admission (Flemish Degree)

Information for holders of a professional Bachelor's degree:

Students with a professional Bachelor's degree Bachelor of Chemistry cannot enter the programme via the bridging programme. They can, however, request a package of exemptions within the Bachelor of Science in Biology programme, which grants direct access to this Master's programme. For more information, please contact: [Sanne.Kiekens@UGent.be](mailto:Sanne.Kiekens@UGent.be).

## ADMISSION REQUIREMENTS FOR INTERNATIONAL DEGREE STUDENTS

The course is open to students with at least a bachelor's degree in the field of biology with minimum 180 credits.

Information on admission requirements and the administrative procedure for admission on the basis of a diploma obtained abroad, can be found on the following page: [www.ugent.be/prospect/en/administration/enrolment-or-registration](http://www.ugent.be/prospect/en/administration/enrolment-or-registration).

## LANGUAGE REQUIREMENTS

Language requirements Dutch: no language requirements  
English: CEFR level B2

The language requirements for this study programme can be found on: [www.ugent.be/languagerequirements](http://www.ugent.be/languagerequirements)

## PRACTICAL INFORMATION

### Study programme
