

INTERNATIONAL MASTER OF SCIENCE IN FIRE SAFETY ENGINEERING

PROGRAMME JOINTLY OFFERED BY GHENT UNIVERSITY, THE UNIVERSITY OF EDINBURGH, LUND UNIVERSITY, UNIVERSITAT POLITÈCNICA DE CATALUNYA
• BARCELONATECH

120 ECTS CREDITS - LANGUAGE: ENGLISH

WHAT

The Fire Safety programme is an ideal specialisation programme for holders of a Bachelor's or Master's degree in engineering or engineering technology, who want to make a difference in the built environment. There is a strong European tendency to move from prescriptive towards performance-based fire safety designs. This goes hand in hand with a strong need for advanced knowledge in the multidisciplinary field of Fire Safety Engineering (FSE). Students taking our Master's programme will be well-prepared for professional activities within this evolving field of FSE, as they will obtain a broad and high-level knowledge. This is a clear asset offered by the joint expertise of three partners, all of whom have a leading role in FSE research and education in Europe.

The IMFSE students will learn how to:

- master the scientific knowledge to understand, evaluate and analyse the phenomenon fire and its consequences critically;
- evaluate and judge risk with respect to fire and explosions critically;
- compute and design different types of fire protection concerning structures, passive fire protection, detection and suppression;
- judge human behaviour in case of fire;
- communicate and collaborate with colleagues within the multidisciplinary domain of Fire Safety Engineering.

Find out more about Fire Safety Engineering in our [FSE Q&A series](#).

STRUCTURE

The two-year IMFSE programme consists of four terms of thirty credits each. The organisation of the curriculum facilitates student mobility: students can choose to change their study location after each term, to learn from the strengths and expertise of each [partner university](#).

The first term, covering basic topics in fire safety engineering, is taught at Ghent University or the University of Edinburgh. All students spend their second term at Lund University, with emphasis on enclosure fire dynamics, risk analysis and human behaviour. During the third term, the focus at Ghent University is on fire safety engineering in the built environment, while at Universitat Politècnica de

Catalunya (UPC) the focus is on wildfires and industrial fire protection. The fourth term is devoted to the Master's dissertation, hosted by one or more of the partner universities.

Master's Dissertation

Completing the Master's dissertation is a requirement for any student who wants to obtain their Master's degree. In our case, it is supervised by at least one of the four partner universities. The Master's dissertation is an original piece of research. Its aim is to develop and strengthen the students' research skills. Students either define their own topic or select one from a topic list.

LABOUR MARKET

The masters can find a job as fire safety engineer:

- in fire protection consultancy companies;
- in design bureaus for structural stability and/or technical equipment of buildings;
- in architect bureaus;
- in fire prevention services of larger cities;
- as responsible person for fire prevention in industry;
- in prevention departments of fire brigades;
- in fire protection equipment industry;
- as fire experts in insurance companies;
- as fire experts in governmental agencies;
- in standard testing laboratories;
- in environmental impact assessment consultancies;
- in health and safety organisations;
- in research and education institutes.

INTERNATIONAL MASTER OF SCIENCE IN FIRE SAFETY ENGINEERING

120 ECTS CREDITS - LANGUAGE: ENGLISH

TOELATINGSVOORWAARDEN VOOR HOUDERS VAN EEN VLAAMS DIPLOMA

1 Na onderzoek van de bekwaamheid van de student om de opleiding te volgen:

- Bachelor in de chemie
- Bachelor in de fysica
- Bachelor in de fysica en de sterrenkunde
- Bachelor in de industriële wetenschappen: chemie
- Een diploma van een bacheloropleiding in het academisch onderwijs, op voorwaarde dat dit verwant is met de andere vermelde diploma's
- Een diploma van een masteropleiding aansluitend op een bacheloropleiding, op voorwaarde dat dit verwant is met de andere vermelde diploma's
- Een diploma van een masteropleiding die volgt op een andere masteropleiding, op voorwaarde dat dit verwant is met de andere vermelde diploma's
- Een diploma van een opleiding 'Bachelor of Science in de ingenieurswetenschappen' (met inbegrip van 'architectuur')

and therefore differ from the required standard level for English taught study programmes as specified in the Ghent University Education and Examination Code.

You may find the most recent version of the language requirements on the University of Edinburgh website:

ADMISSION REQUIREMENTS FOR INTERNATIONAL DEGREE STUDENTS

Information on admission requirements and the administrative procedure for admission to this Erasmus+ study programme, can be found on the following page: <https://imfse.be/>.
Bachelors or Masters in: architecture, civil engineering, electrical engineering, electromechanical engineering, chemical engineering, engineering physics, materials science, urbanism and spatial planning.
Other degrees on the basis of a study of individual skills (e.g. fire safety consultants, fire prevention officers, fire brigade officers, building designers, building services engineers, architectural practitioners).

LANGUAGE REQUIREMENTS

Language requirements Dutch: no language requirements

Language requirements for this study programme follow those set out by the University of Edinburgh

PRACTICAL INFORMATION

Study programme
