

MASTER OF SCIENCE IN BUSINESS ECONOMICS (CORPORATE FINANCE)

60 ECTS CREDITS - LANGUAGE: ENGLISH

WHAT

In the Business Economics programme students become acquainted with almost every functional aspect of the business world: how and why a company is established, how it is financed, how it organises itself administratively, how it produces goods and services, how it markets and sells those goods and services, how it deals with personnel and how the company's management co-ordinates and steers all those activities. The emphasis is on the inside of the business. The Master's programme offers three disciplines that allow you to tailor your curriculum according to your own interests, and become an expert in one of the three functional fields.

In the **Corporate Finance** main subject, we develop your understanding of the core financial dimensions of a company and prepare you to become a specialist in financial management. This specialist main subject will provide you with a detailed understanding of financial statements and how to use them for financial decision-making. We will develop your ability to value companies and manage financial risks. The main subject delves deeper into advanced corporate finance topics, such as financial modelling, banking, mergers & acquisitions, and addresses more recent developments, including crowdfunding, green finance, and FinTech. The focus is not only on established companies but also the on the financing of entrepreneurial ventures; how do professional investors (such as venture capitalists) screen new ventures, how do they value ventures, and how are "term sheets" negotiated? Throughout the course units, you will have numerous opportunities to analyse important case studies in small groups. A Corporate Finance in Practice course unit will prepare you further for a job in corporate finance and bring you into contact with finance professionals. The curriculum also covers research methods related to the field of corporate finance. The research methods toolbox will allow you to develop answers to new problems, which also have important implications for practice and policy-making. A dedicated team of professors and support staff, with experience in teaching as well as professional practice at national and international business schools, policy-making institutions and/or businesses, will guide you.

STRUCTURE

The Master's curriculum has a modular structure, which falls outside the traditional term system. Course units are arranged in modular blocks of six weeks each. Each block contains only two course units, which allows you to process the content in a more focused and in-depth manner. The teaching methods are challenging: case studies, group assignments, discussion panels, lectures, business games,

etc. You sit exams of the two course units at the end of each modular block, but the blocks also contain interim assessments and (group) assignments. As a result, you no longer sit exams in January or June.

In the second term you will take a practical course unit that ties in with your specialisation, and in which you become acquainted with the professional field. You will have enough time in the programme to work on your Master's dissertation. That Master's dissertation is a crucial element of your training. It testifies to your ability to apply the acquired knowledge to a problem independently.

If you want to combine your Master's degree with a Teacher's degree, then there is the option of taking a Master's Programme in Teaching (in Dutch: 'Educatieve master') instead of the above described master. The Master's Programme in Teaching, however, is a Dutch-taught programme. More information can be found on www.ugent.be/educatievemaster.

It is possible to participate in a double degree programme with the Georg-August-Universität Göttingen or with the University Clermont Auvergne. In a double degree programme students receive a degree of both the home and the host university.

LABOUR MARKET

The largest outlet for Business Economics graduates is the business world. We find graduates in every possible position in companies and social profit organisations. Most graduates start their career in the discipline they chose in the Master's programme, but this often shifts after a few years. Some graduates are given greater responsibilities within the original field and become a marketing manager or financial director, and eventually grow into CMO, CFO or even CEO positions. Others expand their career within a different functional field or are promoted to general management posts. The broad orientation of the programme makes such career moves easier. A significant number of graduates chooses what is called an economic profession: accountant, corporate consultant, fiscal advisor, marketing consultant, etc. These professions can be practised as an employee or as a self-employed person. Finally, we also find Business Economics graduates in banks, at insurance companies, government services and services close to the government. Some examples of jobs for graduates in Business Economics:

- auditor
- accountmanager
- digital marketeer
- credit control officer
- executive director
- business advisor
