Keywords

metaphysics of science, scientific realism, natural kinds, essentialism, conventionalism.

Position of the course

In this specialised course the students get insight into the aims and methods of contemporary metaphysics of science by means of a cluster of debates on 'natural kinds'.

Contents

- (1) Study of theories and debates on the topic of 'natural kinds':
 - the most important theories of natural kinds (essentialism, conventionalism and 'homeostatic property cluster').
 - dividing technical artefacts into kinds: natural division or depending on human interests?
 - (psychiatric) diseases as natural kinds (or not)?
 - social science categories (social class, caste ...) as natural kinds (or not?).
- (2) Students focus on one of the debates, theories and/or domains, develop their personal view and argue for it.

Initial competences

Basic knowledge of philosophy of science.

Final competences

- 1 Understanding complex debates in the metaphysics of science (their aims and methods, the positions taken).
- 2 Defending your own position regarding the philosophical debates discussed during this course.

Conditions for credit contract

Access to this course unit via a credit contract is unrestricted: the student takes into consideration the conditions mentioned in 'Starting Competences'

Conditions for exam contract

Access to this course unit via an exam contract is unrestricted

Teaching methods

Seminar, Lecture, Independent work
