Teaching languages

English

Keywords

variational linguistics, language change

Position of the course

The course aims at providing students with a sound understanding of:

- the relation between language variation and the language system, with examples taken from different languages.
- language variation as a mirror of language change.
- theories, models and methods concerning the analysis of spatial and social variation and diachronic change.

Contents

This course deals with language variation and change with particular focus on syntactic variation and change. It consists of two larger components: a theoretical part which is mainly organised around discussing seminal literature on language variation and change, and an empirical research project studying a chosen syntactic change with the help of a parsed corpus (for selected languages; possible choices a.o.: English, French, Portuguese, Icelandic, Old and Middle Low German, Chinese). The work with parsed corpora will be taught by means of a tutorial as well as a practical session.

Initial competences

Solid knowledge about diverse linguistic theories taught in the Bachelor programme.

Final competences

- 1 To have a thorough insight into the structure of language variation and language change.
- 2 To be able to apply both theories and methodologies to new research designs.
- 3 Academic writing skills.

Conditions for credit contract

Access to this course unit via a credit contract is determined after successful competences assessment

Conditions for exam contract

Access to this course unit via an exam contract is unrestricted

Teaching methods

Seminar, Independent work

Extra information on the teaching methods

- independent work/guided independent study: preparation of weekly readings, discussion in class
- guided exercises: working with parsed historical corpora

Study material

Type: Reader

Name: Reader with articles

Indicative price: Free or paid by faculty

Optional: no

Language : English

Available on Ufora : Yes

Additional information: All additional material will be provided through Ufora.

Course content-related study coaching

Individually, during and after class.

Assessment moments

continuous assessment

Examination methods in case of periodic assessment during the first examination period

Examination methods in case of periodic assessment during the second examination period

Examination methods in case of permanent assessment

Assignment

Possibilities of retake in case of permanent assessment

examination during the second examination period is possible

Extra information on the examination methods

Paper (report on own research project). A second chance is possible.

Calculation of the examination mark

Paper: 100%.

Facilities for Working Students

The student has to report on a set list of literature and has to write a paper.

For more information concerning flexible learning: contact the monitoring service of the faculty of Arts and philosophy (<https://www.ugent>).
