Teaching languages

Dutch

Keywords

Archaeology, history, methodology

Position of the course

This basic course is part of a series Methodology. The course intends to give a general overview of methods and theories in European archaeology.

Contents

General overview of different aspects of archaeology as discipline. Amongst others, history of archaeology, archaeological theories, taphonomic processes, relative dating, etc.

Initial competences

Accessible to all students, without specific previous knowledge

Final competences

- 1 To have critical insight into the evolution of archaeology as a science.
- 2 To have knowledge of the large movements that define archaeology.
- 3 To recognise the taxonomic processes archaeology deals with.
- 4 To be able to apply different relative dating techniques (typology, seriation, stratigraphy,...)
- 5 To have a first critical insight in the role of archaeology as an actor in the society of today (ethics, management, archaeology and politics)

Conditions for credit contract

Access to this course unit via a credit contract is unrestricted: the student takes into consideration the conditions mentioned in 'Starting Competences'

Conditions for exam contract

Access to this course unit via an exam contract is unrestricted

Teaching methods
