Keywords

Prospecting techniques, excavation techniques

Position of the course

This basic course is part of a package 'Methodology'. In this case the course helps the student to gain insight into the specific field methods and field techniques of archaeology.

Contents

Overview of the main fieldwork methods in archaeology, discussed on the basis of numerous applications and examples from the field of European and non-European archaeology.

Initial competences

To have a basic understanding of the meaning, theoretical foundations, objectives and history of archaeology.

Final competences

- 1 To have a critical understanding of the various prospection and excavation methods used within archaeology.
- 2 To have an idea of the diverse applications of these techniques in archaeological fieldwork.
- 3 To be ready for practical fieldwork (internships).

- 4 To have a notion of the ethics of archaeological fieldwork.
- 5 To understand the integration of invasive and non-invasive field approaches.

Conditions for credit contract

Access to this course unit via a credit contract is unrestricted: the student takes into consideration the conditions mentioned in 'Starting Competences'

Conditions for exam contract

Access to this course unit via an exam contract is unrestricted

Teaching methods

Lecture, Independent work
