Keywords

scientific research; text edition; heuristics, analysis, source criticism, synthesis

Position of the course

The master's thesis is the capstone in the development of scientific competences related to independent and critical scientific research.

Contents

In this course unit, students work on a comprehensive research thesis, on the basis of which they demonstrate their ability to independently conduct high-quality scientific research in the field of art history (heuristics, source criticism, synthesis). The topic of the research thesis is determined by the students in consultation with the supervisor with relevant research expertise. The thesis is a further deepening of the competences acquired in the bachelor's thesis, and may also tie in with this in terms of content.

Initial competences

Having successfully finished the bachelor program and the bachelor thesis.

Final competences

- 1 Formulate a well-defined and motivated research problem.
- 2 Be able to search and collect relevant, scientifically valuable sources and current literature.
- 3 Analyse and interpret sources critically.
- 4 Apply the prevailing scientific methodologies and terminologies.
- 5 Have the skill to formulate scientific content with respect for the 1 international formal criteria.
- 6 Construct a logic and meticulous argument.
- 7 Formulate verifiable conclusions.
- 8 Present scientific results to a specialized audience.
- 9 Assess the utility of informatics applications in the field of written reporting and deploy them appropriately in scientific research. If generative artificial intelligence is used, this requires an understanding of its operation, limitations, risks and ethical implications for responsible use.

Conditions for credit contract

This course unit cannot be taken via a credit contract

Conditions for exam contract

This course unit cannot be taken via an exam contract

Teaching methods

Master's dissertation, Seminar, Peer teaching

Extra information on the teaching methods

During the academic year, feedback sessions are organised on a regular basis, collectively and/or individually. During these feedback sessions, the progress of the bachelor's thesis is examined on the basis of assignments.

Collective feedback sessions take the form of seminars and/or peer teaching in which students, under supervision, discuss each other's presentations and work and receive feedback from the supervisor and/or tutor.

In the case of (additional) individual supervision, the student reports regularly on the development of the research work to the supervisor and/or tutor, who monitors its smooth progress and makes adjustments if necessary.

The Master's thesis itself is a written piece of work (the research paper) in which the student demonstrates the required final competencies.

Study material

None

References**Course content-related study coaching**

Guidance, individually or in group, by the promotor in collaboration with an assistance or researcher.

Assessment moments

end-of-term and continuous assessment

Examination methods in case of periodic assessment during the first examination period

Oral assessment

Examination methods in case of periodic assessment during the second examination period

Oral assessment

Examination methods in case of permanent assessment

Assignment

Possibilities of retake in case of permanent assessment

examination during the second examination period is possible

Extra information on the examination methods

The students are evaluated based on the submitted dissertation and their oral defence thereof. The defense takes place after submitting the dissertation.

In addition, process evaluation is employed in which the supervisor assesses during feedback sessions the extent to which the student has achieved the final competences.

Calculation of the examination mark

Dissertation: 80%

Oral presentation and defence: 20%

When the student obtains less than 10/20 for the written component, they can no longer pass the course unit as a whole.

If the total score does turn out to be a mark of ten or more out of twenty, this is reduced to the highest fail mark (9/20).

If the student obtained less than 10/20 for the written component, the student will be informed of this before the oral defense and he/she/they may choose not to participate in the oral defense.

Facilities for Working Students

Possibility of absence during feedback sessions.
