**Position of the course**

This course is part of the "Praktijktraject Archivistiek". In this course, students receive an introduction to the theoretical and practical aspects of archival science. Archival science can be described as the (auxiliary) science that studies archival records, archival production, arrangement and description of archives, archives in their context, as well as its relationship to related sciences, best practices regarding storage and consultation of archives, and their history.

**Contents**

The student is introduced to:

- Archival terminology
- History of archival science & institutions
- Archival science in Belgium
- Arrangement & description of archives
- Selection & appreciation of archives
- Material care

**Initial competences**

None

**Final competences**

- 1 To have insight into how archives and heritage institutions work.
- 2 To have insight into the place of history and historians in society.
- 3 To have the ability to indicate the most appropriate types of sources relative to a specific historical research question.
- 4 To have insight into the epistemology and academic practice of historiography.
- 5 To have a basic knowledge of models from the social and historical sciences including sociology, philosophy, literary theory, law, political sciences, communication sciences, and economics.

- 6 To have insight into the methodology of history.
- 7 To have the ability to contextualize historical research and one's own historical practice, and interpret these within a societal reference frame.
- 8 To have a basic knowledge of the diversity of sources and academic literature (also in another language than Dutch) used in historical research and the specialist skills required to read and interpret sources (also in another language than Dutch).
