**Teaching languages**

Dutch

**Keywords**

History of science, antiquity, middle ages, Renaissance.

**Position of the course**

This basic course offers an introduction to the history of the sciences from Greco-Roman antiquity to the Renaissance (c. 500 BCE -1600 CE).

**Contents**

On the basis of different scientific disciplines (astronomy, astrology, natural philosophy, medicine, etc.), we investigate the relation between science and its political, social, and cultural context. *Longue durée* developments are also considered.

**Initial competences**

No prior knowledge of mathematics and science is required. Nor is any knowledge presupposed of Latin or Greek.

**Final competences**

- 1 Having insight in basic philosophical, sociological and historical approaches to science
- 2 Having knowledge of some of the main scientific achievements from the period 500 BC-1600 AD.
- 3 Being able to situate the Greco-Roman scientific disciplines and their successors in their specific political, social, or cultural context.
- 4 Having insight in the main differences, both in terms of content and methodology, between these disciplines and their contemporary equivalents.
- 5 Being able to read premodern scientific texts in a historical-contextual manner.
