Keywords

Administrative-governmental (or: documentary) writing practices, auxiliary sciences, Middle Ages, Early Modern Period

Position of the course

This course offers an overview of the development of documentary writing processes in Europe during the Middle Ages and Early Modern Period. Students will gain insight into the terminology and methodologies used to study medieval and early modern history, in particular the auxiliary sciences of diplomatics, technical chronology (e.g. conversion methods) and sigillography (sphragistics). At the end of the course students will be able to interpret and give critical comment on both the external features and characteristics relative to the content of documentary sources. Finally they will be able to determine whether or not these features correspond to the norms of the time they reportedly stem from (critical authentication).

Contents

Documentary writing practices; pragmatic literacy, (digital) diplomatics (study of charters), technical chronology (e.g. conversion methods), and sigillography (sphragistics); creation of medieval archives and archival management, digital applications and tools developed and used to study documentary sources.
