

Comics and Graphic Novels (A005565)

Course size *(nominal values; actual values may depend on programme)*

Credits 5.0 **Study time** 150 h

Course offerings in academic year 2023-2024

A (semester 1) English Gent

Lecturers in academic year 2023-2024

Ahmed, Maaheen	LW07	lecturer-in-charge
Busi Rizzi, Giorgio	LW07	co-lecturer
Crucifix, Benoit	LW07	co-lecturer

Offered in the following programmes in 2023-2024

	crdts	offering
Master of Arts in Comparative Modern Literature	5	A
Exchange Programme Linguistics and Literature	5	A

Teaching languages

English

Keywords

comics, graphic novels, children's magazines, word-image relationships, intermediality

Position of the course

This course introduces advanced students to possibilities of studying and researching comics, with a special focus on graphic novels and comics magazines.

Contents

The graphic novel has become a staple of the literary scene. It also continues to mystify: is it a work of literature, of visual art? Is it a novel or an art book? What is the difference between comics and graphic novels? Understanding comics as a medium, with graphic novels, albums, comic strips, as different manifestations of the medium, this course seeks to examine comics in all their diversity.

On one hand, the course interrogates the polarities of popular, genre fiction and literary fiction. On the other, it interrogates the differences between literary and cultural products for children and adults and the grey areas where they overlap.

The course is divided into two parts. The first half of the course equips students with basic historical and theoretical tools necessary for analyzing different kinds of comics (comic strips, graphic novels, comics periodicals). The second half comprises of an individual research project developed by the students. Students have the option to choose between graphic novel or comics magazines. For the latter, passive knowledge of French is an advantage. We will work in parallel sessions to discuss the developments of the graphic novel and comics magazine research projects. The results will be communicated through a poster session (for graphic novel projects) and an exhibition (for the comics magazines).

Initial competences

Proof of conducting small research projects and writing research papers (ability to formulate research questions and hypotheses, select and apply appropriate methodologies, distill and evaluate results) through, for instance, a BA paper or another research paper of at least 8.000 words.

Final competences

- 1 Acquire insight into comics histories and methodologies from comics studies, image analysis and periodical studies for reading different kinds of comics (graphic novels, comics magazines).
- 2 Select, combine and apply relevant methodologies for the study of comics
- 3 Design and conduct a comics-based research project
- 4 Incorporate feedback on different stages of the project (research question and methodology, preliminary analysis, results and presentation of results)
- 5 Give feedback to peers on different stages of the project
- 6 Effectively communicate results through a) brief scholarly texts and presentations and b) an individual poster (graphic novels) or small exhibition (comics magazines from the AVP collection)

Conditions for credit contract

Access to this course unit via a credit contract is determined after successful competences assessment

Conditions for exam contract

This course unit cannot be taken via an exam contract

Teaching methods

Group work, seminar, peer teaching, independent work
