Preparatory Course Master of Arts in Linguistics and Literature(main subject German - Spanish)	5	A
Preparatory Course Master of Arts in Linguistics and Literature(main subject Iberian-Romance Languages)	5	A

Teaching languages

Spanish

Keywords

Spanish, morphology, derivation, variation, sociolinguistics, dialectology

Position of the course

The theoretical part of this advanced course studies an important linguistic component of Spanish, notably morphology.

Exchange students may take up this course unit, for which no prior knowledge of Dutch is required.

Contents

Morphology of contemporary Spanish: description of the basic concepts and terminology and of the most important word classes in Spanish (noun, adjective, verb, adverb) in all their different aspects.

This course also discusses different aspects of contemporary morphological variation found in the Spanish-speaking world from a sociolinguistic and dialectological perspective. In order to do so, basic concepts and terminology of these disciplines are also introduced and discussed.

The exercises treat morphology and an extensive range of lexical and grammatical constructions that are characteristic of Spanish. The students also prepare an

individual task on a morphological subject.

Initial competences

To have completed the course Spanish Language Proficiency I and II and Spanish linguistics I or to have acquired the necessary skills by other means.

Final competences

- 1 To have insight into the morphological structure of contemporary Spanish.
- 2 To be able to analyse and classify Spanish words morphologically.
- 3 To have thorough knowledge of the linguistic terms and concepts of Spanish morphology.
- 4 To be able to apply Spanish morphology in practical language use.
- 5 To be able to analyze linguistic phenomena in Spanish from a morphological perspective.
- 6 To critically approach a social, topical issue from a linguistic perspective and apply it to corpus data.
- 7 To understand scientific texts on morphological phenomena in Spanish and summarize their content, if necessary, with responsible use of generative AI where needed or relevant.
- 8 Make use of digital research environments and search strategies to identify research objects.
- 9 To be familiar with the basic concepts, and inter- and transdisciplinary possibilities of Digital humanities.
- 10 To dispose of a strong awareness of language and its role in human interactions and cultural production.

Conditions for credit contract

Access to this course unit via a credit contract is unrestricted: the student takes into consideration the conditions mentioned in 'Starting Competences'

Conditions for exam contract

This course unit cannot be taken via an exam contract

Teaching methods

Seminar, Lecture, Independent work

Extra information on the teaching methods

- Lectures and seminars: interactive method
- Guided self-study: used in preparation of lectures and seminars
- Independent work: individual exercises
- Lecture-based sessions are recorded and made available to specific target groups (upon request).

Assessment moments

end-of-term and continuous assessment

Examination methods in case of periodic assessment during the first examination period

Written assessment with open-ended questions

Examination methods in case of periodic assessment during the second examination period

Written assessment with open-ended questions

Examination methods in case of permanent assessment

Assignment

Possibilities of retake in case of permanent assessment

examination during the second examination period is possible

Extra information on the examination methods

- Theoretical questions
- Exercises on Spanish morphology
- Paper on a morphological topic.
- Students are surveyed via a questionnaire about the use of GenAI for specific parts of this work.
- Participation
- See also article 75 of the OER with respect to absence during the exam. When a student cannot attend the periodical or continuous evaluations due to sickness or other unforeseen circumstances, he has to inform the responsible teacher(s) before the test takes place. Students who do not take part in the assessment of one or more parts of the course evaluation cannot pass the course evaluation. Should the average mark be higher than 10/20, the final mark will be reduced to the highest non-pass mark (= 9).

Calculation of the examination mark

- Theory (50% of the grand total) and exercises (50% of the grand total: 20% paper with peer assessment and 30% written exam). In determining the mark for each student in case of group work, final responsibility on whether or not to deviate from peer assessment marks, or to disregard the peer assessment marks altogether lies with the lecturer.

Facilities for Working Students

Facilities:

- 1 Possible exemption from certain educational activities requiring student attendance
- 2 Possible rescheduling of the examination to a different time in the same academic year
