Teaching languages

Spanish

Keywords

Spanish, linguistics, syntax, semantics, pragmatics, simple and complex sentence structures, functional approach.

Position of the course

This advanced course provides an in-depth study of the syntax and semantics of Spanish.

Exchange students may take this course. It does not require knowledge of Dutch.

Contents

- This course describes general concepts within the domain of syntax and semantics (e.g. deixis, anaphora, agentivity, transitivity, iconicity, prototype theory etc.) and describes all elements that could be part of the nominal and verbal group.
- The following themes and grammatical categories are described: determiners, the adjective (classification and syntactic position), adnominal complements, the

relative clause, morphological, syntactic and semantic classification of verbs (incl. notions such as transitivity, lexical aspect, etc.), the dative in Spanish, pronominal constructions, constructional alternations.

- Students prepare a paper on a topic that has been treated during the lectures. This work is based on comparison of academic sources and a limited digital corpus. The results have to be exposed in written and spoken form, in correct academic Spanish (level B2).

Initial competences

Students have followed the courses Spanish linguistics: Introduction and Spanish linguistics: Morphology or have acquired the necessary skills by other means. Expected language level at the start of the course: B1.

Final competences

- 1 To have thorough knowledge of the syntax, semantics and pragmatics of the nominal and verbal phrase in Spanish.
- 2 To have insight into the syntactic and semantic uniqueness of Spanish.
- 3 To be able to distinguish different kinds of relational structures in a Spanish sentence.
- 4 To be able to assimilate and reproduce a linguistic reasoning.
- 5 To be able to understand scientific texts on linguistics (in casu grammars) of Spanish and to write a report on this investigation, if necessary, with responsible use of GenAI where needed or relevant."
- 6 To be able to conduct a syntactic and semantic analysis of a linguistic item in Spanish.
- 7 To be able to formulate a reasoning fluently and accurately in spoken and written (academic) Spanish (level B2).
- 8 To dispose of a strong awareness of language and its role in human interactions and cultural production.
- 9 Make use of digital research environments and search strategies to identify research objects.
- 10 To use digital methods to collect and manage analogue or digital research objects in a structured way.
- 11 To publish research data or results taking into account a specific target audience.
- 12 To be familiar with the basic concepts, and inter- and transdisciplinary possibilities of Digital humanities.

Conditions for credit contract

Access to this course unit via a credit contract is unrestricted: the student takes into consideration the conditions mentioned in 'Starting Competences'

Conditions for exam contract

This course unit cannot be taken via an exam contract

Teaching methods

Group work, Seminar, Independent work

Extra information on the teaching methods

- During the lectures a series of notions and theories are presented. These are further practiced during seminars and applied to concrete case studies. Several topics are supported by videos on Ufora.
- There is a mix of on campus and online activities: a number of chapters are acquired through blended learning (short video's, learning path and well-oriented feedback on campus).
- For several topics a set of extra exercises (incl. correction key) is provided on Ufora.
- Group work: paper and presentation.
- Lecture-based sessions can be recorded and made available to specific target groups (upon request).

Extra information on the examination methods

Theory: written examination; open questions based on concrete case studies.

Evaluation of paper and presentation. Language proficiency is evaluated at the B2 level. If the language level were insufficient, the student may not pass the paper and/or presentation. During the evaluation of the oral proficiency a rubric is used. When calculating the final score, the outcome of the peer assessment by the group members is taken into account. Students are surveyed via a questionnaire about the use of GenAI for specific parts of this work.

Presence during theoretical classes is strongly recommended. Presence in seminar classes dedicated to the group assignment, including the feedback session, is obligatory.

Students are required to complete mandatory learning paths on Ufora that enable them to participate in the practical classes.

See also article 76 of the OER with respect to absence during the exam. When a student cannot attend the periodical or continuous evaluations due to sickness or other unforeseen circumstances, he has to inform the responsible teacher(s) before the test takes place.

Students who do not take part in the assessment of one or more parts of the course evaluation cannot pass the course evaluation. Should the average mark be higher than 10/20, the final mark will be reduced to the highest non-pass mark (= 9).

Calculation of the examination mark

Periodical exam (70%) and non-periodical (30%).

Non-periodical: 20% assignment and 10% presentation.

Facilities for Working Students

Facilities:

- 1 Possible exemption from certain educational activities requiring student attendance.
- 2 Student attendance during permanent evaluation moments is indispensable.
- 3 Possible rescheduling of the examination to a different time in the same academic year.
- 4 Feedback can be given by email
