French

**Keywords**

French, linguistics

**Position of the course**

This introductory course aims to help students gain an understanding of the French language as a research object. After an introduction to French in general and the Francophony, a significant part of the course is devoted to the scientific description and analysis of morphosyntaxis and to lexicology/lexicography. In addition, students learn to work responsibly and critically with the main grammars and dictionaries, and are introduced to the heuristics of French linguistics.

**Contents**

- Introduction to French syntax: principles of (functional) analysis at sentence level and exercises; basic principles of constituent analysis.
- Systematic study of the word: morphology, word classes and lexicology (focusing on lexical semantics).
- Introduction to some historical and sociological aspects of French language
- Introduction to the most important reference grammars and (types of) dictionaries; basic heuristics of French linguistics; introduction to digital text corpora

**Initial competences**

Competences aligned with the final attainment targets for French in the sixth year of general secondary education (ASO)

## Final competences

- 1 acquire a solid conceptual grid comprising the basic concepts of research in French linguistics w.r.t. the analysis of the clause, clause combining, word classes, morphology and lexicology
- 2 to apply the reference grid presented on new data
- 3 acquire a (passive) knowledge of a broad array of syntactic structures and usages of words
- 4 understand in which respect modern linguistic (hence scientific) approaches of language differ from those of traditional prescriptive grammar
- 5 to be able to use the main reference grammars and dictionaries in an effective way, knowing on which aspect they crucially differ among each other
- 6 to be able to perform a simple search in a digital corpus
- 7 to accept that linguistic structure allows often for various analyses
- 8 to know the most relevant databases en to know how to use them efficiently to find relevant publications about linguistic topics and to locate them within in the UGent libraries.
- 9 students know where French is spoken, which varieties exist and which other languages are spoken in France
