Keywords

Ancient Greek, discourse analysis, historiography, speeches, war narratives, digressions, language system, language change

Position of the course

This course familiarizes students with a discourse-analytical approach to Ancient Greek through the contrastive reading of historiographical texts from Classical and Post-Classical Greek.

Contents

In this course, students learn to critically compare historiographical texts from Classical and Post-Classical Greek using insights from discourse analysis. Particular attention is paid to the relationship between language use, genre conventions, and socio-cultural context.

Three core components of historiography are central: war narratives, speeches, and digressions. These are studied in connection with relevant linguistic systems, such as transitivity, coherence, and evaluation. The reading includes representative passages from authors such as Herodotus, Thucydides, Polybius, and Diodorus Siculus.

Students further develop the grammatical knowledge acquired in the courses *Language Proficiency I*, *Language Proficiency II*, and *Ancient Greek Linguistics: Diachrony* by reflecting on language as a system, on choices within that system, and on language change over time.

Initial competences

Students have already attended previous language acquisition courses and the course Ancient Greek Linguistics I (or have acquired the necessary skills by other means). Good command of Attic Greek (morphology, vocabulary, and syntax) is thus assumed.

Final competences

- 1 To be able to critically compare historiographical texts, with attention to genre conventions, authorial strategies, and socio-cultural context.
- 2 To be able to independently read, explain, and interpret historiographical texts from Classical and Post-Classical Greek using scholarly tools.
- 3 To demonstrate insight into the development of Greek historiography and into major developments from Classical to Post-Classical Greek.
- 4 To be able to identify and analyze relevant linguistic systems, such as transitivity, coherence, and evaluation, in Greek texts.
- 5 To deepen grammatical knowledge of Ancient Greek and demonstrate insight into language as a system, the choices within that system, and language change.
