Position of the course

The goal of this introductory course is twofold. On the one hand it provides insights into the basic underlying principles that are used in translation technology (sentence and word alignment, matching, standard formats, machine translation, terminology extraction, etc.). On the other hand, it provides hands-on experience with selected tools.

Translation technology does not only support the translator during translation, it can also support research in translation studies. This course opts for a blended learning approach and combines contact education for the theoretical part and guided e-learning for the practical part. It encourages students to engage in lifelong learning.

Contents

The course consists of a theoretical part and a practical part. The course covers the following topics:

Theoretical part:
