Keywords

Research paper, research skills, academic writing skills

Position of the course

The 'Bachelor paper' study unit focuses on the practice of critical research skills in an individual academic paper. Heuristic skills and research methods addressed in bachelor 1 and 2 core courses are revised and practised in depth in an online learning module, which focuses on the research steps taken in writing a literature study.

Students learn to master the following skills: selecting academic sources from relevant databases, compiling a list of references, reflecting on methodology, writing a critical analysis and synthesis of academic sources, writing a state of the art, mastering skills of statistical analysis.

As a rule, bachelor papers are not written in Dutch but in the language of the supervisor's language section. Papers supervised by members of the Dutch, Russian, Turkish or Language Technology section, can use Dutch as a main language but conditions apply.

Contents

Students select a research topic from a list of subjects proposed by supervisors or submit a well-motivated proposal. The standard research design for the bachelor paper is a literature review (state of the art) that can provide the basis for empirical research in the student's Master's dissertation.

This standard trajectory is supported by compulsory learning paths on the online learning platform in the course of the first semester. Learning paths practise academic skills (selecting and assessing sources, arguments and structure of academic work, citing and paraphrasing sources, intellectual property and plagiarism, objectivity, features of the abstract, bibliography) and revise research methodology. Students also complete an online data modelling learning path.

Students need to demonstrate that they have acquired the following competences:

- 1) consult academic databases and other digital and non-digital academic search engines and repositories to select relevant publications
- 2) show insight into the contents, argumentation and methodology of sources during feedback discussions with their supervisor
- 3) apply the APA bibliographic conventions of referencing sources in a text and list of references
- 4) compile a critical comparative analysis and synthesis of academic sources and motivate this compilation orally
- 5) elaborate a new research question (at least one) and a research design for a follow-up Master's paper based on the literature study of the bachelor paper
- 6) motivate the possible use of generative AI in skills 1)-5) explicitly in the text of the paper and during an interview
- 7) complete a digital data modelling learning path on Ufora independently

Initial competences

The student has achieved the final objectives of the second bachelor year (general courses, core courses, language practice).

Final competences

- 1 Having a command of the language in which the bachelor paper is written at C1 level of the Common European Framework of Reference for Languages for writing skills. [B.1.2, tested]
- 2 Having knowledge and understanding of the theories related to applied language studies and applying them in the analysis of language use and research topics. [B.1.4, not tested]
- 3 Formulate answers to a research question under supervision and apply a suitable research method in doing so. [B.2.1, assessed]
- 4 Develop and critically evaluate an appropriate research method for different types of research questions. [B.2.1, assessed]
- 5 Formulating a research question on a topic related to applied language studies under supervision, critically using appropriate research methods when analysing and answering the research question, and developing a scientifically underpinned reflection on the topic. [B.2.1, assessed]
- 6 Having a critical understanding of the different sources, heuristic methods and relevant instruments for research in the area of applied language studies with a view to independently gathering and processing data. [B.2.2, assessed]
- 7 Reporting on research in applied language studies, both in Dutch and in the foreign language used in the bachelor paper, tailored to peers in an academic register. [B.2.3, assessed]
- 8 Thinking and reasoning analytically and creatively from a scientific perspective and solving unfamiliar, complex problems based on this academic background. [B.3.2, assessed]
- 9 Being aware of the values and standards that underpin scientific work, respecting intellectual property of others. [B.5.1, assessed]
- 10 Applying digital methods, resources and strategies in research (finding, collecting, analysing) [assessed]
- 11 Students are able to motivate their possible use of AI explicitly in the text of

their paper and during a feedback conversation with their supervisor.
[assessed]

Conditions for credit contract

This course unit cannot be taken via a credit contract

Conditions for exam contract

This course unit cannot be taken via an exam contract

Teaching methods

Independent work

Extra information on the teaching methods

Individual work

Students complete Ufora learning paths in the first semester.

Research paper

Supervised and guided research and writing. Part 1 of the paper is due to be uploaded at the end of the first semester.

Study material

None

Assessment moments

continuous assessment

Examination methods in case of periodic assessment during the first examination period

Examination methods in case of periodic assessment during the second examination period

Examination methods in case of permanent assessment

Assignment

Possibilities of retake in case of permanent assessment

examination during the second examination period is possible

Extra information on the examination methods**Paper**

The student reports on individual research in a paper of ca. 6,000 words in length. The provisional version of the paper (3,000 words) is due to be uploaded to the learning platform at the beginning of the second semester. This part is assessed by the supervisor. Assessment also covers the learning process of the first semester and an evaluation of the student's knowledge of sources, which are uploaded with the text. The mark counts towards 20% of the final grade.

The final script of the bachelor paper is assessed by the supervisor (40%) and the second reader (40%). The evaluation is communicated to the student in a written assessment report. Reports focus on all relevant academic criteria (including source referencing, methodology, interpretative rigour, academic register). The supervisor also comments on the student's learning process and linguistic proficiency and with the insight acquired into the topic studied and its research field. This insight is also assessed by the supervisor and the second reader in an interview with the student after the bachelor paper has been submitted.

Calculation of the examination mark

The final grade is drawn from the following components:

20% part 1 (3,000 words): supervisor

40% final paper: supervisor

40% final paper: second reader
