Keywords

Listening skills ; speaking skills ; note-taking techniques ; interaction ; interpreting in health care ; legal interpreting ; deontology.

Position of the course

This course unit aims at applying the previously learned listening and speaking skills and interpreting techniques (short and long consecutive, whispered interpreting, sight translation, dialogue interpreting) to the specialized contexts of health care and legal interpreting. Students learn to deal with various linguistic, social and emotional challenges and how to apply specific techniques to different circumstances. They also learn how to prepare for interpreting assignments and familiarize themselves with relevant communication resources for interpreting. Students also familiarize themselves with simultaneous interpreting in the cabin in addition to whisper interpreting.

Contents

The course unit focuses on two fundamental fields : interpreting in health care (consultation, therapeutic conversations, admission to hospital,...) and legal interpreting (police interrogations, conversations with investigating judges, court situations). Students sharpen their skills in short and long consecutive interpreting, whispered interpreting, sight translation and dialogue interpreting. They also learn when to use specific techniques, sometimes in one and the same context. Special attention goes to intercultural differences and asymmetry between interlocutors, interaction (including turn management) and deontology. Students are acquainted with variation in the foreign language (sociolects, dialects, non-native speakers).

(Approved)

They learn how to prepare for interpreting assignments, e.g. to draw up their own glossaries.
