Position of the course

This course unit aims at applying the previously learned listening and speaking skills and interpreting techniques (short and long consecutive, whispered interpreting, sight translation, dialogue interpreting) to the specialized contexts of health care and legal interpreting. Students learn to deal with various linguistic, social, emotional and ethical challenges and how to apply specific techniques to different circumstances. They also learn how to prepare for interpreting assignments.

Contents

The course unit focuses on two fundamental fields : interpreting in health care (consultation, therapeutic conversations, admission to hospital,...) and legal interpreting (police interrogations, searches, prison situations, conversations with lawyers and examining magistrates, court situations, etc.). Students sharpen their skills in short and long consecutive interpreting, whispered interpreting, sight translation and dialogue interpreting. They also learn when to use specific techniques, sometimes in one and the same context. Special attention goes to intercultural differences and asymmetry between interlocutors, interaction (including turn management) and deontology. Students are acquainted with variation in the foreign language (sociolects, dialects, non-native speakers). They learn how to prepare for interpreting assignments, e.g. to draw up their own glossaries.

COVID19: Part of the classes will be delivered online in 2020-2021.
