Course offerings and teaching methods in academic year 2021-2022

B (semester 1) Dutch Gent lecture 45.0h

Lecturers in academic year 2021-2022

Albrecht, Johan EB21 lecturer-in-charge

Offered in the following programmes in 2021-2022 crdts offering 5 В

Bachelor of Laws in Laws

Teaching languages

Dutch

Keywords

markets, welfare, economic growth, technology, external effects, sustainability

Position of the course

This course wants to provide insight into economic analysis and into the building blocks of economics as a scientific discipline. After the introductory welfare analysis and overview of economic schools, we analyse current economic developments with special attention for economic growth and inequality, the role of markets versus government, the crisis as a Minsky moment, globalisation, external effects, sustainability, technology and innovation.

Contents

The chapters are constructed from an conceptual perspective, without less essential mathematical elaborations. The interactions between technology, economy and society provide the central theme of the course. The contribution of economic analysis in understanding societal problems and challenges is always highlighted.

Initial competences

No specific prior economic knowledge is required

Final competences

- 1 Understanding and using the building blocks of economic analysis (cost-benefit analysis, marginal analysis, efficiency).
- 2 Understanding the linkages between economic parameters and economic developments.
- 3 Understanding the interactions between the economy, technologies and society.
