Keywords

International law, law of the sea, maritime zones, shipping activities, natural resources, marine environment

Position of the course

This course provides insight into the law of the sea, broadly governing the rights and duties of states in marine areas. This legal regime regulates various activities at sea through a spatial division in distinct maritime zones (entailing different rules for navigation, exploitation and protection of natural resources) and a number of overarching principles. During this course, students also learn to critically assess new developments in the law of the sea within its broader political and economic context, including sustainable development goal (SDG) 14.

Contents

- Importance of the oceans and seas
- History and development of the law of the sea
- Baselines and maritime features
- Maritime zones (including legal status, delineation and delimitation, rights of states, jurisdiction)
 - Internal waters and ports
 - Territorial sea
 - Contiguous zone
 - Exclusive economic zone
 - Continental shelf
 - High seas
 - The Area
- International straits
- Fisheries
- Marine environmental protection
- Dispute settlement
- Selected topical issues

Initial competences

Having basic knowledge of public international law

Final competences

- 1 Understanding the legal regime of the law of the sea and how it is implemented
- 2 Having knowledge of the international legal rules regulating the oceans and seas
- 3 Applying the rules and principles of the law of the sea to actual cases
- 4 Critically assessing topical issues and new developments within the law of the sea
- 5 Developing a personal opinion on topical issues and new developments within the law of the sea
- 6 Presenting and discussing topical issues and new developments within the law of the sea

Conditions for credit contract

Access to this course unit via a credit contract is unrestricted: the student takes into consideration the conditions mentioned in 'Starting Competences'

Conditions for exam contract

This course unit cannot be taken via an exam contract

Teaching methods

Group work, Lecture, Peer teaching

Extra information on the teaching methods

- Lecture: during the classes, students are stimulated to ask questions and to participate actively.
- Group work: students have to prepare a paper on a topical issue related to the law of the sea in small groups.
- Peer teaching: students present the paper to their peers during class, followed by a group discussion.
