Position of the course

To give insights into the relations between animal and law, in the perspective of the historical backgrounds and the social factors.

Contents

In this course the relations between animal and law are dealt with, in the perspective of the historical backgrounds and the social factors. The emphasis is laid on Belgian and European law, sometimes in a comparative approach (Netherlands, Germany), and attention is paid to policy aspects and legal technical aspects.

The topics include:

- animals and law in general: philosophical aspects; animal rights; animals and ownership; species versus individual approach; animal welfare versus animal health; pest animals?; responsibility for animals;
- animal welfare law: historical aspects; study of the existing Belgian and European animal welfare law;
- animal health law: sanitary legislation (mad cow disease, etc.); legislation on hormonal products; food safety legislation; etc.

Initial competences

- to have a knowledge of the basics, the structures and the methodology and systematic of Belgian law
- to have the abilities to analyse and to value legal texts and sources, to solve legal problems
- to have the attitude to be willing to develop a critic and scientific attitude

Final competences

- 1 To have thorough scientific insights into the relations between animals and law, the historical backgrounds and the societal influences
- 2 To have the abilities to analyze and to value legal texts and sources in this matter and to find legal sources and to digest correctly legal information
- 3 To have the abilities to written and oral expression, to formulate synthetically and

scientifically, in team

4 To have the abilities to evaluate each other (peer-evaluation)

5 To argue clearly his own thesis in a discussion

6 To be convinced that animal welfare is needed for sustainable development, and to be open minded for a positive role of the law in it
