Assessment moments

end-of-term assessment

Examination methods in case of periodic assessment during the first examination period

Oral examination, Written examination with open questions

Examination methods in case of periodic assessment during the second examination period

Oral examination, Written examination with open questions

Examination methods in case of permanent assessment

Possibilities of retake in case of permanent assessment

examination during the second examination period is possible

Extra information on the examination methods

Period-linked: examination with written preparation in which the focus is not so much on detailed knowledge, but on substantive insights and connections.

In addition, a group work is made, usually around the theme 'mobility week'. The group work accounts for 50% of the final total.

For students who take the subject at 3 SP, the same study material content applies (only there is a differentiation with regard to the oral examination concerning the theory).

Calculation of the examination mark

50% theory (oral examination with written preparation). For 5 SP, one has to answer both questions; for 3 SP, only one of the questions.
50% practice (for 5 or 3 SP the same conditions apply).
