Lecturers in academic year 2026-2027

Verbeke, Lize	PP07	lecturer-in-charge
De Clercq, Barbara	PP07	co-lecturer
Van Hiel, Alain	PP07	co-lecturer

Offered in the following programmes in 2026-2027

	crdts	offering
Bachelor of Science in Criminological Sciences	4	A
Master of Science in Teaching in Social Sciences(main subject Criminological Sciences)	4	A
Master of Science in Biomedical Sciences	4	A
Master of Science in Criminological Sciences	4	A

Teaching languages

Dutch

Keywords

Forensic Psychology, Psychology & Law, Criminological Psychology

Position of the course

This is an optional course in the master of law or criminological sciences. This course adds to the multidisciplinary knowledge about criminal behavior. The specific goals of this course are the gain of insight in how Psychology and Law interact and are complementary to each other.

This is an in-depth course that extends upon themes that are seen in the courses "Social Psychology" and "Forensic Psychiatry".

Contents

This course exists of three parts.

Part I focuses on the underlying mechanisms and developmental processes of different forms of antisocial/violent/deviant behavior (e.g. sexual violence, partner violence and radicalization). Etiological bio-psycho-social theories with attention for biological (e.g. neurological deviances), psychological (e.g. personality traits) and social (e.g. environmental factors) risk factors will be elaborated and discussed. Across different forms of antisocial behavior, an explicit developmental perspective is taken, focusing on early identification and the various developmental trajectories of antisocial behavior.

In **Part II** we focus on offender rehabilitation. Current leading models (i.e. the Risk-Needs-Responsivity (RNR) and Good Lives Model (GLM)) are discussed, including their implications for processes of risk taxation and – management and treatment.

The final **Part III** elaborates on aspects of Legal Psychology, focusing on how psychological processes (e.g. memory, perception, social pressure) may influence legal practice. In this vein, we focus for example on the interrogation process, false confessions and witness statements.

In each part, we will focus on the translation of theoretical insights to clinical and criminological practice. Therefore, different guest speakers from different forensic

contexts (e.g. police, forensic psychiatry) will be invited

Initial competences

Credit of the course Social Psychology or having acquired the competences of this course in another way.

Final competences

1. Being able to elaborate on the underlying mechanisms and developmental processes of different forms of criminal behavior.
2. Being able to link different frameworks of different forms of criminal behavior with each other.
3. Having knowledge on current leading models and diagnostic instruments in offender rehabilitation
4. Being able to explain the role of psychological processes in legal practice.
5. Knowing how theoretical forensic psychological frameworks are translated in forensic psychological practice
6. Being able to apply theoretical insights on forensic case studies

Conditions for credit contract

Access to this course unit via a credit contract is unrestricted: the student takes into consideration the conditions mentioned in 'Starting Competences'

Conditions for exam contract

This course unit cannot be taken via an exam contract

Teaching methods

Seminar, Lecture

Extra information on the teaching methods

During the lectures, we will focus on theory. The theory will be illustrated with examples from practice, case studies and exercises. Also different guest colleges with forensic practitioners are planned.

Additionally, a seminar involving practice with risk assessment is included.

All lectures are recorded and made available to all students after the lecture until the end of the semester. The seminar is not recorded.

Study material

Type: Syllabus

Name: The relevance of individual differences in a forensic (developmental) framework. Selected chapters from "Personality in context and development" (De Clercq, 2027).

Indicative price: € 35

Optional: no

Language : Dutch

Available on Ufora : No

Online Available : No

Available in the Library : No

Available through Student Association : Yes

Additional information: This book serves as course material for different lectures that address individual differences from both a developmental psychological/forensic perspective, and through the link between certain maladaptive traits and offending behavior

Type: Handouts

Name: Handouts of the lessons - to be printed by the student

Indicative price: € 15

Optional: no

Available on Ufora : Yes

Usability and Lifetime within the Course Unit : one-time

Course content-related study coaching

- Contact during the lessons
- Interactive support through Ufora
- Possibility for individual appointments

Assessment moments

end-of-term and continuous assessment

Examination methods in case of periodic assessment during the first examination period

Written assessment with multiple-choice questions, Written assessment with open-ended questions

Examination methods in case of periodic assessment during the second examination period

Written assessment with multiple-choice questions, Written assessment with open-ended questions

Examination methods in case of permanent assessment

Participation

Possibilities of retake in case of permanent assessment

examination during the second examination period is possible in modified form

Extra information on the examination methods

INFORMATION END-OF-TERM ASSESSMENT

Exam with multiple choice and open questions, examining the content of the lectures and the seminar.

INFORMATION CONTINUOUS ASSESSMENT

Presence and participation at the seminar is obligatory. When the student is not present and/or does not participate at the seminar, it is not possible to succeed for this course. Students who were legally absent can participate at a replacement seminar at another date.

Calculation of the examination mark

All points (100%) are obtained in the periodic evaluation (written exam). Multiple choice questions make up 75% (15/20) of the total score.

Facilities for Working Students

Students with a job have access to all online documents through Ufora. They are expected to participate at the seminar and the written exam.
