Investigation, report

Position of the course

The bachelor project concerns independent work, followed by a written and an oral report. The teachers of the bachelor education propose subjects for such projects. The bachelor project relates to a general course, to an optional course, or to a broadening course mathematics of the bachelor education.

Contents

The student investigates a subject related to a course. This investigation can take many forms: a theoretical study of a subject (e.g. based on a book, a book chapter or a scientific paper), an investigation with more practical work (programming, Sage, statistical analysis,...), ... The bachelor project finishes with a short oral presentation. For more information about the choice of the subject and the formal content, we refer to <http://www.wiskunde.ugent.be/praktische-organisatie/bachelorproject-masterproef.php>

Initial competences

120 study point credits of the Bachelor education mathematics.

Final competences

- 1 To be able to study a subject, place it in context, solve a problem which exceeds the difficulty of an ordinary exercise (possibly using techniques of different courses).
- 2 To be able to find original arguments of bounded complexity.
- 3 To be able to perform a limited study of the international literature.
- 4 To be able to write a report about one's own investigation, possibly compare it with solutions in the literature, orally defend it.
- 5 Prove to be independent, enthusiastic and show a sense of precision.
