Keywords

Sea and society

Position of the course

Contents

In this course the students will apply the knowledge learnt in the course 'The Sea and Society; Historical Perspectives, Present Status and Future Challenges' to real case studies. This course follows a project-based learning methodology. Students will work individually or in small teams, supervised by an academic supervisor, developing a practical project focused on one of the subjects taught in 'The Sea and Society; Historical Perspectives, Present Status and Future Challenges'.

Initial competences

Students have a sufficient educational background and practical skills in the field of marine sciences for accomplishing their tasks.

Final competences

- 1 Students should be able to integrate and apply their knowledge about the relationship between the sea and the human society, and about what conflicts are associated with different aspects of societal "interests" and "uses" of the sea and its resources.
- 2 Students will also develop the necessary attitude, engagement and skills for understanding, exploring and communicating with stakeholders and general public about marine issues, including the environment and the natural resources.

Conditions for credit contract

Access to this course unit via a credit contract is determined after successful competences assessment

Conditions for exam contract

This course unit cannot be taken via an exam contract

Teaching methods

Project

Extra information on the teaching methods

The course consists of project work on a topic related to the relation between sea and society, which should result in an oral presentation and a written report.

Assessment moments

continuous assessment

Examination methods in case of periodic assessment during the first examination period

Examination methods in case of periodic assessment during the second examination period

Examination methods in case of permanent assessment

Report, Oral examination, Assignment

Possibilities of retake in case of permanent assessment

examination during the second examination period is possible

Extra information on the examination methods

The course is examined through a final assignment including both a written and an oral presented part.

Calculation of the examination mark

60% of the score will be given based on the student's report (in writing), their performance and activities. At the end of the course the students will organize a workshop where they will present publicly the results of their experience. Their oral and/or poster presentations will count for 40% of the final score.
