Dutch

Keywords

Philosophy, Critical Thinking, Ethics, Knowledge, Science, Bio-ethics, Moral development, Research Ethics

Position of the course

The Master of Science of Health Promotion study programme aspires to train professionals who are duly capable of developing, implementing and evaluating health education and health promotion programmes in a variety of different settings. This philosophy course functions as a grounding course that will sharpen the students' critical, analytical and synthetical abilities and attitudes and thus lies the basis for an engaged and critical career in health-oriented services.

Contents

In this course students are introduced with central philosophical and ethical issues and viewpoint on man, knowledge and world. The course also provides a introductory overview int philosophy and ethics of sport.

The first part of the course provides an overview of the major philosophical problems, of the most prominent schools of thought attempting to solve these problems, and of the salient concepts that have become characteristic to philosophical thought.

In the second part of the course issues relevant to the program will be discussed like the emergence of bioethics, moral development, care ethics and research ethics.

Initial competences

Competences acquired during previous bachelor studies

Final competences

- 1 To understand the specific nature of philosophical problems and types of analysis.
- 2 To be able to understand current philosophical thinking, based on a solid academically sound historical background.
