Keywords

social cognition, social influence, social relations, Helping others, Aggression, Sustainability, Multicultural society

Position of the course

This educational component contributes to the general and multidisciplinary scientific education of students by enabling them to acquire knowledge about the main social-psychological concepts, theories and research methods. The component aims to impart to students knowledge of, and insight into, the relevance of social psychology to applied settings and society as a whole.

Contents

Introduction

- People are social animals
- Social psychology: definition and related disciplines
- A brief history of social psychology
- Social psychology in the 21st century

Social perception

- The raw materials of the first impression
- Attributions: from elements to dispositions
- Integration: from dispositions to impressions
- Confirmation biases: from impressions to reality

Social influence

- Automatic social influence
- Conformity
- Compliance
- Obedience

Attitudes

- Attitudes: basic findings
- Persuasion by communication
- Persuasion by behavior
- Advertisement and information

Helping Others

- Why do we help other people?
- In which circumstances do people help?
- Who helps?
- Interpersonal factors: Who is being helped?

Aggression

- What is aggression?
- Cross-national and intracultural differences
- The origin of aggression
- Social psychological theories of aggression
- The impact of violent media
- Hidden violence

Group performance

- Collective processes
- Disagreement and different opinions
- Small group performance
- Groupthink: losing perspective

Stereotypes, prejudice and discrimination

- Expressions of prejudice
- The bases of prejudice and discrimination
- Social categorization and stereotypes
- Sexism

The multicultural society

- Diversity
- Interethnic contact reduces prejudice
- Problems with interethnic contact
- Living together in school and the workplace
- Measures, media, laws and regulations

Towards a sustainable world

- Self-interest versus a prosocial orientation
- Ecological behaviour
- Conflict resolution
- To have or to be?

Initial competences

The student must meet the admission requirements of the program.

It builds on the competences acquired in the Bachelor's degree programs admitted to this program

Final competences

- 1 To be able to relate and frame theoretical concepts, and to understand their implications
- 2 To be able to actualize one's knowledge and insights
- 3 To be able to contribute to societal debate
- 4 To be able to situate the interpersonal, social and cultural context of human behaviour, and to apply social psychology to social problems and realistic cases.
- 5 Knowledge of social identities and ethnic-cultural stereotypes, prejudice and discrimination, as well as of processes that alleviate these phenomena.
- 6 Knowledge of sustainability, both in terms of our use of natural resources, as well as in the context of social relationships.

Conditions for credit contract

Access to this course unit via a credit contract is determined after successful competences assessment

Conditions for exam contract

This course unit cannot be taken via an exam contract

Teaching methods

Seminar, Lecture

Extra information on the teaching methods

- Lectures with demonstration.
- Digital seminars including 1. Obedience and Milgram, 2. Aggression, & 3. how does it feel to be discriminated against? Video material about the method of Jane Elliot and discussion.
