

## Operating Systems (E019010)

**Course size** *(nominal values; actual values may depend on programme)*

**Credits 6.0**

**Study time 180 h**

**Course offerings and teaching methods in academic year 2024-2025**

A (semester 1)	Dutch	Gent	lecture
			practical
			seminar

**Lecturers in academic year 2024-2025**

De Bosschere, Koen	TW06	lecturer-in-charge
Coppens, Bart	TW06	co-lecturer

**Offered in the following programmes in 2024-2025**

	crdts	offering
<a href="#">Bachelor of Science in Engineering(main subject Computer Science Engineering)</a>	6	A
<a href="#">Bachelor of Science in Computer Science</a>	6	A
<a href="#">Preparatory Course Master of Science in Bioinformatics(main subject Engineering)</a>	6	A

**Teaching languages**

Dutch

**Keywords**

process management, memory management, system management, security

**Position of the course**

This course builds on the knowledge acquired in the computer architecture course. It teaches the basic principles of the internal organisation, the programming model and the use of modern operating systems.

**Contents**

- Operating systems: Overview, Process management, Synchronisation, Main memory management, File and disk management, Unix commands, Command shell, Scheduling, File systems, Device drivers, Virtualization, Protection and security
- System management: Domains of system management, Production processes and support, Unix, Windows
- Some other systems: Real-time systems, Fault tolerant systems, Parallel an distributed systems
- The triumph of the nerds. Documentary about the pc's history.

**Initial competences**

Programming in C, computer architecture

**Final competences**

- 1 To know the history of operating systems
- 2 To have insight in process management
- 3 To correctly use synchronization primitives
- 4 To understand memory management
- 5 To understand input/output
- 6 To understand virtualization
- 7 To have insight in protection and protection mechanisms

**Conditions for credit contract**

Access to this course unit via a credit contract is determined after successful competences assessment

### Conditions for exam contract

This course unit cannot be taken via an exam contract

### Teaching methods

Seminar, Lecture, Practical

### Extra information on the teaching methods

Practicals make use of the student's laptop.

### Study material

Type: Slides

Name: Annotated slides with the operating system course

Indicative price: Free or paid by faculty

Optional: yes

Language : Dutch

Number of Slides : 800

Oldest Usable Edition : 2023

Available on Ufora : Yes

Online Available : Yes

Available in the Library : No

Available through Student Association : Yes

### Course content-related study coaching

Teaching staff.

### Assessment moments

end-of-term and continuous assessment

### Examination methods in case of periodic assessment during the first examination period

Written assessment

### Examination methods in case of periodic assessment during the second examination period

Oral assessment

### Examination methods in case of permanent assessment

Assignment

### Possibilities of retake in case of permanent assessment

examination during the second examination period is not possible

### Extra information on the examination methods

PE1: written closed-book assessment.

PE2: oral closed-book assessment, written preparation at blackboard.

NPE: evaluation of practical report.

### Calculation of the examination mark

First examination period: the exam counts for 80% and the labs count for 20% of the final score. Absence for the labs is translated into 0 for that sub-score. The final score is the weighted average of the two sub-scores.

Students can only pass this course if they obtain a minimum 10/20 for the exam. If students obtain less than 10/20 for the exam and if the weighted final score would be 10 or more out of 20, it is reduced to the highest unsuccessful final score, i.e. 9/20.

Second examination period: same arrangement with retention of marks for non-period evaluation.

### Facilities for Working Students

There is no compulsory presence during the semester.
