Recent Trends in Photonics (E030740)

Due to Covid 19, the education and evaluation methods may vary from the information displayed in the schedules and course details. Any changes will be communicated on Ufora.

Course Specifications

Valid as from the academic year 2015-2016

Course offerings and teaching methods in academic year 2021-2022

A (semester 1) English Gent

- Lecture 10.0 h
- Project 20.0 h

Lecturers in academic year 2021-2022

- Bogaerts, Wim TWOS lecturer-in-charge
- Clemmen, Stéphane TWOS co-lecturer

Offered in the following programmes in 2021-2022

Teaching languages

- English

Keywords

- research, photonics

Position of the course

Through this course the student will be confronted with a number of recent topics in photonics through external and internal experts who present their research or work (in English). Guest lecturers from companies will expose the student to the application of photonics in industry. Furthermore each student is expected to study one topic in more detail based on scientific articles and give a seminar in English for his fellow students. During this course, the student will be able to hone his oral and written communication skills.

Contents

- Seminars: Seminars by external speakers, internal speakers and students
- Visits: company visits, conference visits
- Methodologie: creating a bibliography, presentation techniques

Initial competences

1. Being able to study a recent trend in photonics in an independent and critical manner.
2. Being able to handle large quantities of new information.
3. Being able to create a reliable reference list.
4. Being able to give an accessible talk for non-specialists.
5. Being able to write a short document summarising a recent trend.

Conditions for credit contract

Access to this course unit via a credit contract is determined after successful competences assessment

Conditions for exam contract

This course unit cannot be taken via an exam contract

Teaching methods

- Lecture, project

(Approved)
Learning materials and price

Evaluation methods
  continuous assessment

Examination methods in case of periodic evaluation during the first examination period

Examination methods in case of periodic evaluation during the second examination period

Examination methods in case of permanent evaluation
  Oral examination, report

Possibilities of retake in case of permanent evaluation
  examination during the second examination period is not possible

Extra information on the examination methods
  During semester: graded oral presentation; graded project reports.

Calculation of the examination mark
