Course Specifications
Valid as from the academic year 2015-2016

Recent Trends in Photonics (E030740)

Due to Covid-19, the education and evaluation methods may vary from the information displayed in the schedules and course details. Any changes will be communicated on Ufora.

Course size
- Credits: 4.0
- Study time: 120 h
- Contact hrs: 30.0 h

Course offerings and teaching methods in academic year 2021-2022

A (semester 1)  
English  
Gent  
lecture: 10.0 h  
project: 20.0 h

Lecturers in academic year 2021-2022
- Bogaerts, Wim (TW05)  
- Clemmen, Stéphane (TW05)

Offered in the following programmes in 2021-2022
- Bridging Programme Master of Science in Photonics Engineering 4 A
- European Master of Science in Photonics 4 A
- Master of Science in Photonics Engineering 4 A

Teaching languages
- English

Keywords
- research, photonics

Position of the course
Through this course the student will be confronted with a number of recent topics in photonics through external and internal experts who present their research or work (in English). Guest lecturers from companies will expose the student to the application of photonics in industry. Furthermore each student is expected to study one topic in more detail based on scientific articles and give a seminar in English for his fellow students. During this course, the student will be able to hone his oral and written communication skills.

Contents
- Seminars: Seminars by external speakers, internal speakers and students
- Visits: company visits, conference visits
- Methodologie: creating a bibliography, presentation techniques

Initial competences
1. Being able to study a recent trend in photonics in an independent and critical manner.
2. Being able to handle large quantities of new information.
3. Being able to create a reliable reference list.
4. Being able to give an accessible talk for non-specialists.
5. Being able to write a short document summarising a recent trend.

Conditions for credit contract
Access to this course unit via a credit contract is determined after successful competences assessment.

Conditions for exam contract
This course unit cannot be taken via an exam contract.

Teaching methods
- Lecture, project

(Approved)
Learning materials and price

Evaluation methods
continuous assessment

Examination methods in case of periodic evaluation during the first examination period

Examination methods in case of periodic evaluation during the second examination period

Examination methods in case of permanent evaluation
Oral examination, report

Possibilities of retake in case of permanent evaluation
examination during the second examination period is not possible

Extra information on the examination methods
During semester: graded oral presentation; graded project reports.

Calculation of the examination mark

(Approved)
