

Two-phase Heat Transfer (E032730)

Course size *(nominal values; actual values may depend on programme)*

Credits 3.0 **Study time 90 h**

Course offerings in academic year 2026-2027

A (semester 1) English Gent

Lecturers in academic year 2026-2027

| | | |
|------------------|------|--------------------|
| De Paepe, Michel | TW08 | lecturer-in-charge |
| Beyne, Wim | TW08 | co-lecturer |

Offered in the following programmes in 2026-2027

| | crdts | offering |
|--|-------|----------|
| Master of Science in Electromechanical Engineering | 3 | A |
| Master of Science in Mechanical and Electrical Systems Engineering | 3 | A |

Teaching languages

English

Keywords

Two phase flow, evaporation, condensation, melting, solidification

Position of the course

This is an advanced academic elective course in the learning line thermo-fluids.

Contents

- Fundamentals of gas – liquid two phase flow: Flow regimes and pressure drop
- Boiling heat transfer:
 - Pool Boiling: correlations for surfaces and bundles
 - Critical heat flux: correlations
 - Flow boiling: flow regime based methods
- Condensation heat transfer:
 - Condensation modes
 - Film condensation: heat transfer and pressure drop
 - Dropwise condensation: phenomenology & heat transfer correlations
- Technical applications
- Melting & solidification: heat transfer and physical phenomena
- Thermal energy storage
 - Types
 - Phase change materials
 - Heat exchanger design & system simulation

Initial competences

- Transport Phenomena
- Technical Thermodynamics
- Heat and Flow Engineering

Final competences

Conditions for credit contract

Access to this course unit via a credit contract is determined after successful competences assessment

Conditions for exam contract

This course unit cannot be taken via an exam contract

Teaching methods

Seminar, Excursion, Lecture

Extra information on the teaching methods

- The theory is taught in lectures.
- Project work

Study material

None

References**Course content-related study coaching**

- Interactive support through the electronic learning platform (forums, e-mail), in person: after agreement on date, fixed contact hour: immediately before and after lectures.
- Additional guidance by assistant for exercise classes.

Assessment moments

continuous assessment

Examination methods in case of periodic assessment during the first examination period**Examination methods in case of periodic assessment during the second examination period****Examination methods in case of permanent assessment**

Presentation, Assignment

Possibilities of retake in case of permanent assessment

not applicable

Extra information on the examination methods

- Project work on boiling heat transfer
- Presentation of paper in this research field

Calculation of the examination mark

Project and presentation each 50% of the marks.
