**Lecturers in academic year 2024-2025**

Bonne, Hendrik

TW08

lecturer-in-charge

**Offered in the following programmes in 2024-2025**

**crdts**

**offering**

Master of Science in Electrical Engineering Technology(main subject Automation)

3

A

Master of Science in Electromechanical Engineering(main subject Control Engineering and Automation)

3

A

Master of Science in Electrical Engineering Technology(main subject Electrical Engineering)

3

A

Master of Science in Electromechanical Engineering(main subject Electrical Power Engineering)

3

A

Master of Science in Electromechanical Engineering(main subject Maritime Engineering)

3

A

Master of Science in Electromechanical Engineering(main subject Mechanical Construction)

3

A

Master of Science in Electromechanical Engineering(main subject Mechanical Energy Engineering)

3

A

Master of Science in Electromechanical Engineering Technology

3

A

**Teaching languages**

English

**Keywords**

spoorvervoer, rollend materieel, tractie, remsystemen, veiligheid, adhesie, loopstabiliteit  
railway transportation, rolling stock, traction, braking, safety, adhesion, running stability

**Position of the course**

This course treats the basics of railway technology. It is an application of mechanics and electrotechnical technology.

**Contents**

- Railway transport: context, economical, ecological and sociological aspects
- traction systems: types
- Rolling stock: basic concepts, traction equipment, braking systems
- Railway guidance: driving resistance, adhesion, power, running stability
- Propulsion of train vehicles
- tracks

**Initial competences**

mechanical, electrotechnical and electronics basics

**Final competences**

1 Being able to explain electrical traction.

- 2 Being able to explain running stability.
- 3 Being able to make choices in rolling stock braking systems.

**Conditions for credit contract**

Access to this course unit via a credit contract is determined after successful competences assessment

**Conditions for exam contract**

This course unit cannot be taken via an exam contract

**Teaching methods**

Excursion, Lecture

**Extra information on the teaching methods**

Company visits are aimed at rolling stock and train operation

**Study material**

Type: Syllabus

Name: Railway Technology Fundamentals

Indicative price: € 5

Optional: no

Language : English

Number of Pages : 150

Available on Ufora : No

Online Available : No

Available in the Library : No

Available through Student Association : No

Additional information: the course might be available via the student organization
