#### Keywords

Validation of prototype and business model

#### Position of the course

The student learns to collect feedback on a business idea and to structure this feedback into a first draft of business model.

#### Contents

The student team starts from a business idea that will be confronted with the environment, e.g. distributors, potential customer groups and users, suppliers, designers, producers, regulation ... Based on the methodology and in consultation with the coach, the critical building blocks of the business model are mapped and linked.

- The feedback mechanism
- The business model concept
- The value proposition
- The customer segments
- The key activity system (content – structure – governance)
- The revenue model
- The cost structure
- The financing structure

#### **Initial competences**

Such a project requires an entrepreneurial attitude, a self-management ability, perseverance, flexibility, creativity and eagerness to learn.

#### **Final competences**

- 1 Insight in the key components of the business model concept.
- 2 To be able to collect relevant market/sector feedback on a business idea/concept.
- 3 To be able to build a prototype and adapt it based on the market feedback.
- 4 Insight in the value to be offered to (specific) customers (segments).
- 5 Insight in the key activities that are necessary to create value and in the way participants are involved.
- 6 Insight in the cost structure implied by the key activities.
- 7 Insight in the revenue model, the facts and hypotheses underlying a realistic revenue forecast.
- 8 Insight in financing needs inherent to the choices made in the business model.
