

Advanced Topics in Architecture 4 (E087110)

Due to Covid 19, the education and evaluation methods may vary from the information displayed in the schedules and course details. Any changes will be communicated on Ufora.

Course size	<i>(nominal values; actual values may depend on programme)</i>		
Credits 6.0	Study time 180 h	Contact hrs	60.0 h

Course offerings and teaching methods in academic year 2022-2023

Deze cursus is 2-jaarlijks en wordt niet aangeboden

Lecturers in academic year 2022-2023

Davidts, Wouter	LW17	lecturer-in-charge
Lagae, Johan	TW01	co-lecturer

Offered in the following programmes in 2022-2023

	crdts	offering
Deze cursus is 2-jaarlijks en wordt niet aangeboden		

Teaching languages

Dutch, English

Keywords

Architecture, interdisciplinarity, methodology of scientific research

Position of the course

This Advanced Topic focusses on a specific research subject related to the broad field of architecture. In this course, students are introduced into the methodology of scientific research. The teaching format of the seminar, which stimulates a continuous interaction between teacher and student, is considered essential to the learning process. The research subjects addressed in the Advanced Topic correspond to a study and workload of 6 credits.

Contents

The content of the research subjects varies each year, responding to current research, contemporary debates, exhibitions and conferences. The subjects, introduced through a number of lectures, are situated within the broad field of architecture and cross the boundaries of individual research fields. The interdisciplinary character of architecture is at the core of this course.

Initial competences

Being in the possession of a Bachelor of Science in Engineering: Architecture, or meeting the admission requirements for the Master of Science in Engineering: Architecture, or having acquired these competences in a different way.

Final competences

- 1 Formulating a research question, and developing an appropriate research method.
- 2 Gaining insight in the methods of scientific research and research by design.
- 3 Applying methods of scientific research and research by design in an independent way.
- 4 Processing the results of this research into a coherent report.
- 5 Reporting through scientific and design-related means on a complex research question.

Conditions for credit contract

Access to this course unit via a credit contract is determined after successful competences assessment

Conditions for exam contract

This course unit cannot be taken via an exam contract

Teaching methods

Lecture, project, seminar, self-reliant study activities, online lecture, online project, online seminar

Extra information on the teaching methods

This course is organized through work sessions, taking the form of seminars. During these sessions, new topics are introduced through (guest)lectures, new skills are developed interactively, and students present insights and progressions, which they acquired through individual study, to their mentors. The distribution over the various education methods will be announced during the semester via Ufora. Due to Covid19, the education methods may differ from the information displayed in the schedules and course details. Any changes will be communicated on Ufora.

Learning materials and price

Literature is made available via the electronic learning environment. Additional material to be searched via internet, library, ...

References

Depending on the research subject, chosen that year (see literature Ufora).

Course content-related study coaching

Students are mentored in work sessions. External specialists can be invited to attend intermediate and final presentations.

Evaluation methods

continuous assessment

Examination methods in case of periodic evaluation during the first examination period**Examination methods in case of periodic evaluation during the second examination period****Examination methods in case of permanent evaluation**

Participation, assignment

Possibilities of retake in case of permanent evaluation

examination during the second examination period is possible in modified form

Extra information on the examination methods

- First examination period: evaluating the report (may be accompanied by an oral presentation or conversation).
- Retake possibility: students choose whether or not they deliver an additional report in the second examination period.

Calculation of the examination mark

- First examination period: 30% participation in seminars, 70% report.
- Resit: the mark in the second examination period is the weighted average of the permanent evaluation in the first examination period and the additional task. If students do not take the resit possibility, the final mark for the first examination period is the resit mark. Due to Covid19, the evaluation methods and the calculation of the examination mark may differ from the information displayed in the schedules and course details, especially if one or more evaluations cannot be organised on campus or cannot be organised at all. Any changes will be communicated on Ufora.
