Course offerings and teaching methods in academic year 2021-2022

| A (semester 2) | English | Gent | seminar | 15.0 h |
| excursions    |         |      | lecture | 5.0 h  |
| classes       |         |      |         | 17.5 h |
|               |         |      |         | 2.5 h  |

O (semester 2)

Lecturers in academic year 2021-2022

| Strubbe, Filip | TW06 | lecturer-in-charge |
| Khelifi, Samira | WE04 | co-lecturer |

Offered in the following programmes in 2021-2022

Teaching languages

English

Keywords

Photovoltaics, solar energy, sustainable energy

Position of the course

To get familiar with solar energy and its conversion to electrical work, by means of the photovoltaic effect.

Ecological advantages of sustainable energy.

Positioning of the sustainable energies within a broader thermodynamic context.

Contents

- Availability of solar energy
- Thermal conversion
- Principles of photovoltaic conversion
- Realistic efficiency
- Classical silicon solar cells (mono and polycrystalline)
- Amorphous solar cells
- GaAs solar cells
- Heterojunction solar cells
- Ecology and economy

Initial competences

basics of thermodynamics, quantumphysics, solid-state physics, semi-conductor physics, diode theory

Final competences

1. INSIGHTS: Understanding the basic principles of photovoltaic energy conversion.
2. Understanding the limitations of realistic solar panels.
3. INSIGHTS: The ecological benefits of sustainable energy. Understanding the efficiency and

(Approved) 1
limitations of photovoltaic and thermal energy conversion.

3. PROFICIENCIES: Calculations of the available solar energy.

4. PROFICIENCIES: Calculations of the conversion and the conversion efficiency of solar energy.

Conditions for credit contract

Access to this course unit via a credit contract is determined after successful competences assessment.

Conditions for exam contract

This course unit cannot be taken via an exam contract.

Teaching methods

Excursion, lecture, seminar, seminar: practical PC room classes.

Learning materials and price

Course notes.

References

Course content-related study coaching.

Evaluation methods

End-of-term evaluation and continuous assessment.

Examination methods in case of periodic evaluation during the first examination period

Written examination, oral examination.

Examination methods in case of periodic evaluation during the second examination period

Written examination, oral examination.

Examination methods in case of permanent evaluation

Report.

Possibilities of retake in case of permanent evaluation

Examination during the second examination period is possible.

Extra information on the examination methods

Calculation of the examination mark

Period-bound evaluation: written + oral examination: 80%

Non-period-bound evaluation: report computer practicum: 20%.
