Keywords

Corporate social responsibility (CSR), corporate sustainability, social entrepreneurship, sustainable HRM, sustainability

Position of the course

This course aims at stimulating students to think of the implications with respect to organizations operating as an open system in a "stakeholder" context. Corporate social responsibility is approached in this context from managerial and economic perspectives, in which organizations interact with their stakeholders and the natural environment. In this context, also employees are approached as stakeholders and insights are provided about sustainable HRM, with a focus on achieving a balance between interests of human capital (people), the organization

(Approved) 1

(profit) and society (planet). The course contributes primarily to the better understanding of the organizational operations in a wider (social) context. Moreover, theories, models and concepts are proposed in order to stimulate scientifically grounded analyses on corporate social responsibility problems.
