Teaching languages

English

Keywords

Marketing, business project, presentations

Position of the course

Marketing in practice aims to prepare students for a future job within Marketing. The students are actively brought into contact with the professional domain through various activities and they are exposed to current topics in marketing. Marketing in practice expands the knowledge acquired in the Master's program by completing projects under conditions of increasing independence. In doing so, the application of marketing knowledge, the development of marketing skills, as well as reporting on and presenting insights are central. Students will also work in teams and will need to reflect critically.

Contents

The business projects are defined annually, in function of current challenges facing the professional field. The students solve these challenges, relying on knowledge and skills acquired in the various bachelor and master courses. Students' performance will testify of adequate professional skills, attitudes, insights, and initiative. Afterwards, a discussion with the practitioners involved in the business project will take place.

To become further acquainted with the professional field, a guest speaker will be invited to discuss a hot topic in marketing in practice. This lecture is followed by a network event with alumni.

Initial competences

Students should have the following credits:

- a) Bachelor courses in the field of Marketing.
- b) The student should have completed or be in the process of completing specialized marketing courses, including consumer behaviour, market research methods, business and international marketing, marketing communication, business development and strategic selling, and digital marketing.

Final competences

- 1 Convert the knowledge and skills, acquired during their studies, into practice.
- 2 Effectively interpret information.

- 3 Draw informed conclusions to solve a problem.
- 4 Adequately communicate insights to peers in a clear and structured way.
- 5 Map complex issues or assignments.
- 6 Master research methods and techniques.
- 7 Make recommendations in an informed and critical way.
- 8 Solve issues or assignments in a creative manner.
- 9 Show initiative.
- 10 Develop a critical attitude towards your learning process and that of others
- 11 Work in team to solve a problem
