Keywords

Public policy, policy content and process, policy trends and developments

Position of the course

This course aims to give students insight into the essence, development and applicability of the policy science so that they can better approach (typify and contextualize) and understand (explain and compare) public policy.

Contents

This course consists out of three parts. A first part is introductory and explains what (government) policy is and how it has been studied within the policy science. The dynamics of policy-making are put central in a second part that zooms in on the different stages of the policy process (i.e. agenda-setting, policy formulation, decision-making, policy implementation, policy evaluation and evolution). The third

and last part zooms in on policy trends and developments such as 'evidence-based' policy-making.

Initial competences

Students are expected to have a general insight into the functioning of public (governmental) organizations. Students are also expected to follow up developments in public policy-making at local, central and global level.

Final competences

- 1 Students approach public policy from a scientific point of view.
- 2 Students delimit the content and process of public policy.
- 3 Students apply the above competencies on concrete cases of public policy.
- 4 Students gather policy-relevant information in order to assess public policy and to gain insight into policy-making.
- 5 Students have developed an attitude of life-long learning vis-à-vis public policy.

Conditions for credit contract

Access to this course unit via a credit contract is determined after successful competences assessment

Conditions for exam contract

This course unit cannot be taken via an exam contract

Teaching methods

Lecture: plenary exercises, Online lecture: plenary exercises, Online lecture, Guided self-study, Lecture
