Teaching languages

Dutch

Keywords

public finance, taxation, government debt and expenditures, fiscal federalism

Position of the course

The main objective of this course is to study public revenues, expenditures and debt using a public economics approach. As such, insights from the course "introduction to economics (BA2)" considering market failure and the need for government intervention resulting from externalities is further deepened. The course focuses on local, regional and federal governments, which is in line with the government levels studied in "seminars in public administration".

Contents

The course covers 5 topics:

1. Introduction to the aim of public finance theory, welfare economics, welfare distribution and redistribution
2. The study of the public revenues in a setting of fiscal federalism
3. The study of optimal tax structures and systems; analysis of recent tax reforms in the Flemish Region
4. The study of public deficits; inquiry into the effects of budgetary norms
5. The study of the optimal level of public debt in the context of the EU Growth and Stability Pact and the era of ageing

Initial competences

knowledge concerning:

- utility maximizing behavior of economic agents
- the macro economic relationship between fiscal policy, debt, interest rates and economic growth

- the federalistic structure of the state

Final competences

- 1 Being capable to argue why a specific government level is the appropriate one to levy a given tax
- 2 being able to evaluate tax systems using the Musgrave & Musgrave criteria
- 3 being able to express the main theoretical insights on public debt, the effects of ageing on the public budget and debt financing
- 4 being capable to analyze scientific articles independently and to develop a case using these scientific insights
- 5 being able to compare fiscal federalism systems
- 6 being able to discuss measures of redistribution through taxes
- 7 being capable to analyze scientific articles independently and to develop a case using these scientific insights
- 8
being able to criticize or support conjectures considering public finance
